- Batteries that contain lead-acid (e.g., rechargeable batteries, etc.).
Step 2: Insert an SD memory card

Insert an SD memory card into the SD memory card slot straight to the end, and confirm a click sound is heard. (direct the label face of the SD memory card insertion opening)

Step 3: Making connections

- Connect an Ethernet cable (category 5e or better, straight) to RJ45 (female network cable)
  - The maximum cable length is 100 m (328 feet)

Step 4: Mount the camera

- Align the direction of the Panasonic logo on the top view with "TOP" on the attachment plate
  - Align the OPEN mark on the side of the camera with the protruding part of the base bracket
  - Insert 3 attachment mounting holes on the base bracket to the corresponding mounting holes on the camera
  - Align the LOCK mark on the base bracket to the corresponding "LOCK" mark on the attachment plate

Step 5: Configure the network settings

Connect the settings of the camera after installing the旆行ソフトウェア。Once the camera configuration is completed, return to the original state.

- The launcher window will be displayed.

Step 6: Make fine adjustment to the image direction

- Secure the camera by tightening the camera fixing screws by using the bit (accessory).
