ALL RIGHTS RESERVED.
Any and all information, including, among others, wordings, pictures, graphs are the properties of Hangzhou Hikvision Digital Technology Co., Ltd. or its subsidiaries (hereinafter referred to be “Hikvision”). This user manual (hereinafter referred to be “the Manual”) cannot be reproduced, changed, translated, or distributed, partially or wholly, by any means, without the prior written permission of Hikvision. Unless otherwise stipulated, Hikvision does not make any warranties, guarantees or representations, express or implied, regarding to the Manual.

About this Manual
This Manual is applicable to E Series Network Speed Dome.
The Manual includes instructions for using and managing the product. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. Please find the latest version in the company website (http://overseas.hikvision.com/en/).

Please use this user manual under the guidance of professionals.

Trademarks Acknowledgement

Legal Disclaimer
TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE PRODUCT DESCRIBED, WITH ITS HARDWARE, SOFTWARE AND FIRMWARE, IS PROVIDED “AS IS”, WITH ALL FAULTS AND ERRORS, AND HIKVISION MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF THIRD PARTY. IN NO EVENT WILL HIKVISION, ITS DIRECTORS, OFFICERS, EMPLOYEES, OR AGENTS BE LIABLE TO YOU FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, OR INDIRECT DAMAGES, INCLUDING, AMONG OTHERS, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, OR LOSS OF DATA OR DOCUMENTATION, IN CONNECTION WITH THE USE OF THIS PRODUCT, EVEN IF HIKVISION HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

REGARDING TO THE PRODUCT WITH INTERNET ACCESS, THE USE OF PRODUCT SHALL BE WHOLLY AT YOUR OWN RISKS. HIKVISION SHALL NOT TAKE ANY RESPONSIBILITITES FOR ABNORMAL OPERATION, PRIVACY LEAKAGE OR OTHER DAMAGES RESULTING FROM CYBER ATTACK, HACKER ATTACK, VIRUS INSPECTION, OR OTHER INTERNET SECURITY RISKS; HOWEVER, HIKVISION WILL PROVIDE TIMELY TECHNICAL SUPPORT IF REQUIRED. SURVEILLANCE LAWS VARY BY JURISDICTION. PLEASE CHECK ALL RELEVANT LAWS IN YOUR JURISDICTION BEFORE USING THIS PRODUCT IN ORDER TO ENSURE THAT YOUR
USE CONFORMS THE APPLICABLE LAW. HIKVISION SHALL NOT BE LIABLE IN THE EVENT THAT THIS PRODUCT IS USED WITH ILLEGITIMATE PURPOSES.
IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATER PREVAILS.
Regulatory Information

FCC Information
Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

FCC compliance: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Conditions
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation

EU Conformity Statement
This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points.

For more information see: www.recyclethis.info.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info.

Industry Canada ICES-003 Compliance
This device meets the CAN ICES-3 (A)/NMB-3(A) standards requirements.
Safety Instruction

These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss.

The precaution measure is divided into **Warnings** and **Cautions**:

**Warnings:** Neglecting any of the warnings may cause serious injury or death.

**Cautions:** Neglecting any of the cautions may cause injury or equipment damage.

<table>
<thead>
<tr>
<th>Warnings Follow these safeguards to prevent serious injury or death.</th>
<th>Cautions Follow these precautions to prevent potential injury or material damage.</th>
</tr>
</thead>
</table>

**Warnings**

- In the use of the product, you must be in strict compliance with the electrical safety regulations of the nation and region.
- Refer to technical specifications for detailed information.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 24 VAC or 12 VDC according to the IEC60950-1 standard. Refer to technical specifications for detailed information.
- Do not connect several devices to one power adapter as adapter overload may cause over-heating or a fire hazard.
- Make sure that the plug is firmly connected to the power socket.
- Make sure that the power has been disconnected before you wire, install or dismantle the speed dome.
- When the product is mounted on wall or ceiling, the device shall be firmly fixed.
- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cable, and then contact the service center.
- If the product does not work properly, contact your dealer or the nearest service center. Never attempt to disassemble the speed dome yourself. (We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.)

**Cautions**

- If the speed dome fails to synchronize local time with that of the network, you need to set up speed dome time manually. Visit the speed dome (via web browser or client software) and enter system settings interface for time settings.
- Make sure the power supply voltage is correct before using the speed dome.
• Do not drop the speed dome or subject it to physical shock, and do not expose it to high electromagnetism radiation. Avoid installation on vibrations surface or places subject to shock (ignorance can cause device damage).

• Do not touch sensor modules with fingers. If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently. If the speed dome will not be used for an extended period, replace the lens cap to protect the sensor from dirt.

• Do not aim the speed dome at the sun or extra bright places. Blooming or smearing may occur otherwise (which is not a malfunction), and affect the endurance of sensor at the same time.

• The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.

• Do not place the speed dome in extremely hot, cold, dusty or damp locations, and do not expose it to high electromagnetic radiation.

• To avoid heat accumulation, good ventilation is required for operating environment.

• Keep the speed dome away from liquid while in use.

• While in delivery, the speed dome shall be packed in its original packing, or packing of the same texture.

• Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery manufacturer.

1 Overview

1.1 Speed Dome Overview
The network speed dome has six series:
- DE4xxx Series
- DE4xxxi Series (IR)
- DE5xxx Series
- DE5xxxi Series (IR)
- DE6xxxi Series (IR)
- DE7xxxi Series (IR)

*Note:*
The figures below are for reference only, refer to the actual product as the standard.

1.1.1 Overview of DE4xxx Series Speed Dome

Figure 1-1 Overview of DE4xxx Series Speed Dome
1.1.2 Overview of DE4xxxl Series (IR) Speed Dome

Figure 1-2 Overview of DE4xxxl Series (IR) Speed Dome

Figure 1-6 Overview of DE7xxx Series (IR) Speed Dome

1.2 Cable Interfaces

The cable interfaces of the speed dome are shown in Figure 1-7. The cables are distinguished by different colors. Refer to the labels attached on the cables for identification.

Notes:

- The cables vary depending on different speed dome models.
- Make sure the speed dome is power-off before you connect the cables.

![Cable Interfaces Diagram]

Figure 1-7 Cable Interfaces
1.3 Alarm Output

Alarm output is shown in Figure 1-8.

Figure 1-8 Alarm Output
2 Installation

Before you start:
Check the package contents and make sure that the device in the package is in good condition and all the assembly parts are included.

Notes:
● Do not touch the bubble directly by hand. The image blurs otherwise.
● Do not power the speed dome up until the installation is finished. To ensure the safety of personnel and equipment, all the installation steps should be done with power supply off.
● Do not drag the speed dome with its waterproof cables; otherwise the waterproof performance is affected.

Figure 2-1 Do Not Drag the Cables

2.1 Installing DE4xxx Series Speed Dome

2.1.1 Wall Mounting

Notes:
● For cement wall, you need to use the expansion screw to fix the bracket. The mounting hole of the expansion pipe on the wall should align with the mounting hole on the bracket.
● For wooden wall, you can just use the self-tapping screw to fix the bracket.
● Make sure that the wall is strong enough to withstand more than eight times the weight of the speed dome and the accessories.
● The bracket in Figure 2-4 is the recommended bracket for this series of speed dome, and a pendent adapter is required if any other bracket is selected. The dimension of pendant adapter is G1\(\frac{1}{2}\).
Steps:

1. Install the memory card.
   1) Loosen the lock screws on the speed dome bubble and remove the bubble.
   2) Remove the protective lens cover, foam, and sticker.

![Figure 2-2 Remove the Protective Accessories](image)

3) Align the memory card with the memory card slot and insert it.

![Figure 2-3 Memory Card Slot](image)

4) Install the bubble back and tighten the lock screws.

2. Install the bracket.
   1) Get the bracket and screws from the packing box as shown in Figure 2-4.

![Figure 2-4 Wall Mounting Bracket](image)

2) Drill four screw holes in the wall according to the holes on the bracket, and then insert four M8 expansion screws into the mounting holes.
3) Attach the gasket and the bracket to the wall by aligning the four screw holes on the bracket with four expansion screws on the wall.

4) Secure the bracket with four hex nuts and washers.

3. Install the speed dome to the bracket.
   1) Hook the two ends of the safety rope to the speed dome back box and the bracket respectively as shown in Figure 2-6.

2) Route the cables through the bracket and connect the corresponding cables.
3) Loosen the lock screws on the bracket.
4) Align the speed dome with bracket and rotate it to the bracket counterclockwise or clockwise tightly as shown in Figure 2-7.
5) Tighten the two lock screws with the wrench to secure the speed dome and the bracket.

4. Remove the protective film on the bubble after the installation is finished.

2.1.2 In-ceiling Mounting

*Notes:*

- The height of the space above the ceiling must be more than 250 mm.
- The thickness of the ceiling must range from 5 mm to 40 mm.
- The ceiling must be strong enough to withstand more than four times the weight of the speed dome and the accessories.

*Steps:*

1. Disassemble the speed dome.
   1) Loosen three screws and remove the bubble.
   2) Loosen three screws and remove the back box.
   3) Remove the protective lens cover, foam, and sticker.

![Figure 2-8 Disassemble the Speed Dome](image)

2. Install the memory card.

![Figure 2-9 Memory Card Slot](image)

3. Drill screw holes in the ceiling.
   1) Attach the drill template to the ceiling where you want to install the speed dome.
2) Cut a hole and drill screw holes according to the drill template.

Note:

±2 mm of the circle diameter is tolerable.

4. Install the toggle bolts.
   1) Remove the toggle from the toggle bolt.
   2) Insert the bolts into the screw holes on the speed dome as shown in Figure 2-10.

![Figure 2-10 Toggle Bolt Holes]

3) Rotate the bolts through the screw holes.
4) Install the toggles back as shown in Figure 2-11.

![Figure 2-11 Install the Toggle Bolts]

5. Install the speed dome to the ceiling.
   1) Align the toggle bolts with the screw holes on the ceiling.
   2) Push the speed dome to the mounting hole on the ceiling.
   3) Rotate the bolts again. The toggle will automatically rotate down to secure the speed dome to the ceiling.
4) Secure the bubble to the back box with three screws as shown in Figure 2-13.

6. Route the cables through the ceiling.
7. Remove the protective film on the bubble after the installation is finished.

2.1.3 Ceiling Mounting

*Notes:*
- The thickness of the ceiling must range from 5 mm to 40 mm.
- The ceiling must be strong enough to withstand more than four times the weight of the speed dome and the accessories.
- If the speed dome is installed to the wooden ceiling, use the self-tapping screws to secure the mounting base.
- If the speed dome is installed to the cement ceiling, drill three Φ5 mm screw holes onto the ceiling according to the position of the holes, and then secure the mounting base to the ceiling with expansion screws.

*Steps:*
1. Disassemble the speed dome.
   1) Loosen three screws and remove the bubble.
   2) Remove the protective lens cover, foam, and sticker.
3) Attach the bubble to the back box, and secure it with screws.

2. Install the memory card.

3. Drill screw holes in the ceiling.
   1) Attach the drill template to the ceiling where you want to install the speed dome.
   2) Drill screw holes and a cable hole (optional) according to the drill template.

4. Install the speed dome to the ceiling.
   1) Align the ceiling bracket with the screw holes on the drill template. And secure the ceiling bracket to the ceiling with screws (supplied).
   2) Align the hook of the ceiling with unlock label on the speed dome.
   3) Push the speed dome to the ceiling bracket and rotate clockwise to secure it.

5. Remove the protective film on the bubble after the installation is finished.
2.2 Installing DE4xxxI Series (IR) Speed Dome

2.2.1 Wall Mounting

*Notes:*
- For cement wall, you need to use the expansion screw to fix the bracket. The mounting hole of the expansion pipe on the wall should align with the mounting hole on the bracket.
- For wooden wall, you can just use the self-tapping screw to fix the bracket.
- Make sure that the wall is strong enough to withstand more than eight times the weight of the speed dome and the accessories.
- The bracket in Figure 2-4 is the recommended bracket for this series of speed dome, and a pendent adapter is required if any other bracket is selected. The dimension of pendent adapter is G1 1/2.

*Steps:*
1. Install the memory card.
   1) Loosen the lock screws on the rear cover and remove the rear cover.
   2) Align the memory card with the memory card slot and insert it.

![Figure 2-16 Memory Card Slot (Type I)](image)
![Figure 2-17 Memory Card Slot (Type II)](image)
3) Install the rear cover back and tighten the lock screws.

2. Install the bracket.

   **Note:**
   Refer to *step 2* in **Section 2.1.1 Wall Mounting**.

3. Install the speed dome to the bracket.
   1) Hook the two ends of the safety rope to the speed dome and the bracket respectively as shown in Figure 2-18.

![Figure 2-18 Safety Rope](image)

2) Route the cables through the bracket and connect the corresponding cables.
3) Loosen the lock screws on the bracket.
4) Align the speed dome with bracket and rotate it to the bracket tightly.
5) Tighten the two lock screws with the wrench to secure the speed dome and the bracket.

![Figure 2-19 Secure the Speed Dome](image)

4. Remove the protective film on the bubble after the installation is finished.
2.2.2 In-ceiling Mounting

*Note:*
- The height of the space above the ceiling must be more than 250 mm.
- The thickness of the ceiling must range from 5 mm to 40 mm.
- The ceiling must be strong enough to withstand more than four times the weight of the speed dome and the accessories.

**DE4xxx Series (IR) Type I Speed Dome**

**Steps:**

1. Install the memory card.

   *Note:*

   Refer to step 1 in Section 2.2.1 Wall Mounting.

2. Drill screw holes in the ceiling.
   1) Attach the drill template to the ceiling where you want to install the speed dome.
   2) Cut a hole and drill screw holes according to the drill template.

   *Note:*

   ±2 mm of the circle diameter is tolerable.

3. Route the cables through the ceiling for the speed dome.

4. Install the toggle bolts.
   1) Remove the toggle from the toggle bolt.
   2) Insert the bolts into the screw holes on the speed dome.
   3) Rotate the bolts through the screw holes.
   4) Install the toggles back as shown in Figure 2-20.

![Figure 2-20 Install the Toggle Bolts](image)

5. Install the speed dome to the ceiling.
   1) Align the toggle bolts with the screw holes on the ceiling.
2) Push the speed dome to the mounting hole on the ceiling.

Figure 2-21 Push to the Mounting Hole

3) Rotate the bolts again. The toggle will automatically rotate down to secure the speed dome to the ceiling.

Figure 2-22 Install the Speed Dome to the Ceiling

6. Remove the protective film on the bubble after the installation is finished.

DE4xxxl Series (IR) Type II Speed Dome

Steps:

1. Install the memory card.
   
   **Note:**
   
   Refer to step 1 in *Section 2.2.1 Wall Mounting*.

2. Drill screw holes in the ceiling.
   
   1) Attach the drill template to the ceiling where you want to install the speed dome.
   
   2) Cut a hole and drill screw holes according to the drill template.
      
      **Note:**
      
      ±2 mm of the circle diameter is tolerable.

3. Route the cables through the ceiling for the speed dome.
4. Install the bracket on the speed dome.
   1) Place the in-ceiling bracket on the speed dome according to the direction of the arrow shown in Figure 2-23.
   2) Rotate and tighten the screws on the bracket to fix the bracket with the speed dome.

![Figure 2-23 Install the Bracket](image)

5. Install the speed dome to the ceiling.
   1) Align the toggle bolts with the screw holes on the ceiling.
   2) Push the speed dome according to the direction of the arrow in Figure 2-24 to the mounting hole.

![Figure 2-24 Push to the Mounting Hole](image)

3) Rotate the screws clockwise and the toggle will automatically rotate down to secure the speed dome to the ceiling. Fix the locks on the ceiling.
Figure 2-25 Install the Speed Dome to the Ceiling

6. Install the trim ring.

Figure 2-26 Install the Trim Ring

7. Remove the protective film on the bubble after the installation is finished.

2.3 Installing DE5xxx Series Speed Dome

2.3.1 Wall Mounting

Notes:
- Refer to Section 2.1.1 Wall Mounting for wall mounting steps for DE5xxx series speed dome.
- Refer to Figure 2-27 for memory card slot of DE5xxx series speed dome.

Figure 2-27 Memory Card Slot
2.3.2 In-ceiling Mounting

*Notes:*
- The height of the space above the ceiling must be more than 250 mm.
- The thickness of the ceiling must range from 5 mm to 40 mm.
- The ceiling must be strong enough to withstand more than four times the weight of the speed dome and the accessories.

*Steps:*
1. Disassemble the speed dome.
   1) Rotate the bubble counterclockwise to separate it from the back box.
   2) Remove the protective lens cover, foam, and sticker.
   3) Install the memory card.

![Diagram showing disassembly process]

Figure 2-28 Disassemble the Speed Dome

4) Attach the bubble to the back box, and rotate clockwise to secure it.

2. Drill screw holes in the ceiling.
   1) Attach the drill template to the ceiling where you want to install the speed dome.
   2) Cut a hole and drill screw holes according to the drill template.

   *Note:*
   ±2 mm of the circle diameter is tolerable.

3. Install the speed dome to the ceiling.
   1) Loosen the two lock screws on both sides of the back box and make the locks in internal position as shown in Figure 2-29.
2) Push the back box into the mounting hole in the ceiling.
3) Tighten the lock screws with the screwdriver and the locks will automatically rotate outwards to secure the in-ceiling bracket to the ceiling.

4. Install the trim ring.
5. Remove the protective film on the bubble after the installation is finished.

2.4 Installing DE5xxxI Series (IR) Speed Dome

Notes:
- Refer to Section 2.1.1 Wall Mounting for wall mounting steps for DE5xxxI series (IR) speed dome.
- Refer to Figure 2-31 for memory card slot of DE5xxxI (IR) series speed dome.
2.5 Installing DE6xxxI Series (IR) Speed Dome

*Notes:*
- Refer to *Section 2.1.1 Wall Mounting* for wall mounting steps for DE6xxxI series (IR) speed dome.
- Refer to Figure 2-32 for memory card slot of DE6xxxI (IR) series speed dome.

2.6 Installing DE7xxxI Series (IR) Speed Dome

*Notes:*
- Refer to *Section 2.1.1 Wall Mounting* for wall mounting steps for DE7xxxI series (IR) speed dome.
- Refer to Figure 2-33 for memory card slot of DE7xxxI (IR) series speed dome.
Figure 2-33 Memory Card Slot
3 Setting the Speed Dome over the LAN

Notes:

- You shall acknowledge that the use of the product with Internet access might be under network security risks. For avoidance of any network attacks and information leakage, strengthen your own protection. If the product does not work properly, contact with your dealer or the nearest service center.

- To ensure the network security of the speed dome, we recommend you to have the speed dome assessed and maintained termly. You can contact us if you need such service.

3.1 Wiring

To view and configure the speed dome via LAN (Local Area Network), you need to connect the network speed dome in the same subnet with your PC. Then, install the SADP or client software to search and change the IP address of network speed dome. Connect the speed dome to network according to the following figures.

![Figure 3-1 Connecting Directly](image1)

![Figure 3-2 Wiring over LAN](image2)

3.2 Activating the Speed Dome

Purpose:

You are required to activate the speed dome first by setting a strong password for it before you can use the speed dome.
Activation via web browser, activation via SADP, and activation via client software are supported. We will take activation via SADP software and activation via web browser as examples to introduce the speed dome activation.

### 3.2.1 Activation via Web Browser

**Steps:**
1. Power on the speed dome. Connect the speed dome to your computer or the switch/router which your computer connects to.
2. Input the IP address into the address bar of the web browser, and enter the activation interface.

**Notes:**
- The default IP address of the speed dome is 192.168.1.64.
- The computer and the speed dome should belong to the same subnet.
- For the speed dome enables the DHCP by default, you need to use the SADP software to search the IP address.

![Activation Interface (Web)](image)

3. Create a password and input the password into the password field.

**STRONG PASSWORD RECOMMENDED**— *We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.*

4. Confirm the password.
5. Click OK to activate the speed dome and enter the live view interface.

### 3.2.2 Activation via SADP Software

SADP software is used for detecting the online device, activating the device, and resetting the password.
Get the SADP software from the supplied disk or the official website, and install the SADP according to the prompts.

Follow the steps to activate the speed dome.

**Steps:**

1. Run the SADP software to search the online devices.
2. Check the device status from the device list, and select an inactive device.

![SADP Interface](image)

**Figure 3-4 SADP Interface**

**Note:**

The SADP software supports activating the speed dome in batch. Refer to the user manual of SADP software for details.

3. Create a password and input the password in the password field, and confirm the password.

**STRONG PASSWORD RECOMMENDED**—We highly recommend you create a strong password of your own choosing (Using a minimum of 8 characters, including at least three of the following categories: upper case letters, lower case letters, numbers, and special characters.) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

**Note:**

You can enable the Hik-Connect service for the device during activation. Refer to **Section 5.1 Enable Hik-Connect Service on Speed Dome**.

4. Click **Activate** to save the password.

**Note:**

You can check whether the activation is completed on the popup window. If activation failed, make sure that the password meets the requirement and try again.
3.3 Modifying the IP Address

**Purpose:**
To view and configure the speed dome via LAN (Local Area Network), you need to connect the network speed dome in the same subnet with your PC. Use the SADP software or client software to search and change the IP address of the device. We take modifying the IP Address via SADP software as an example to introduce the IP address modification.

**Note:**
For IP address modification via client software, refer to the user manual of client software.

**Steps:**
1. Run the SADP software.
2. Select an active device.
3. Change the device IP address to the same subnet with your computer by either modifying the IP address manually or checking the **Enable DHCP** checkbox.

![Modify Network Parameters](image)

Figure 3-5 Modify the IP Address

**Note:**
You can enable the Hik-Connect service for the device during activation. Refer to **Section 5.1 Enable Hik-Connect Service on Speed Dome.**
4. Input the admin password and click **Modify** to activate your IP address modification. The batch IP address modification is supported by SADP. Refer to the user manual of SADP for details.
4 Accessing via Web Browser

**System Requirement:**
Operating System: Microsoft Windows XP SP1 and above version/Vista/Win7/Server 2003/Server 2008 32bits
CPU: Intel Pentium IV 3.0 GHz or higher
RAM: 1G or higher
Display: 1024 × 768 resolution or higher
Web Browser: Internet Explorer 7.0 and above version, Apple Safari 5.02 and above version, Mozilla Firefox 5 and above version and Google Chrome8 and above version

**Steps:**
1. Open the web browser.
2. In the browser address bar, input the IP address of the network speed dome, and enter the login interface.
   **Note:**
   The default IP address is 192.168.1.64. You are recommended to change the IP address to the same subnet with your computer.
3. Input the user name and password.
   The admin user should configure the device accounts and user/operator permissions properly. Delete the unnecessary accounts and user/operator permissions.
   **Note:**
   The device IP address gets locked if the admin user performs 7 failed password attempts (5 attempts for the user/operator).
4. Click Login.

![Figure 4-1 Login Interface](image)

5. Install the plug-in before viewing the live video and managing the network speed dome. Follow the installation prompts to install the plug-in.
   **Note:**
   You may have to close the web browser to finish the installation of the plug-in.
6. Reopen the web browser after the installation of the plug-in and repeat the above step 2 to step 4 to login.

*Note:*
For detailed instructions of further configuration, refer to the user manual of network speed dome.
5 Operating via Hik-Connect App

Purpose:
Hik-Connect is an application for mobile devices. With the App, you can view live image of the speed dome, receive alarm notification and so on.

Note:
Hik-Connect service is not supported by certain speed dome models.

5.1 Enable Hik-Connect Service on Speed Dome

Purpose:
Hik-Connect service should be enabled on your speed dome before using the service.
You can enable the service through SADP software or web browser.

5.1.1 Enable Hik-Connect Service via SADP Software

Steps:
1. Check the Enable Hik-Connect checkbox on:
   1). "Activate the Device" page during speed dome activation, refer to Section 3.2.2 Activation via SADP Software.
   2). Or "Modify Network Parameters" page during modifying IP address, refer to Section 3.3 Modifying the IP Address.
2. Create a verification code or change the verification code.

   Figure 5-1 Verification Code Setting (SADP)

Note:
The verification code is required when you add the speed dome to Hik-Connect app.
3. Click and read "Terms of Service" and "Privacy Policy".
4. Confirm the settings.

5.1.2 Enable Hik-Connect Service via Web Browser

**Before you start:**
You need to activate the speed dome before enabling the service. Refer to Section 3.2 Activating the Speed Dome.

**Steps:**
1. Access the speed dome via web browser. Refer to Chapter 4 Accessing via Web Browser.
2. Enter platform access configuration interface:
   - **Configuration > Network > Advanced Settings > Platform Access**
   - ![Configure Platform Access](image)

3. Select Platform Access Mode as Hik-Connect.
4. Check the **Enable** checkbox.
5. Click and read "Terms of Service" and "Privacy Policy" in pop-up window.
6. Create a verification code or change the verification code for the speed dome.
   **Note:**
   The verification code is required when you add the speed dome to Hik-Connect app.
7. Save the settings.

5.2 Hik-Connect Setup

**Steps:**
1. Download and install the Hik-Connect app by searching “Hik-Connect” in App Store or Google Play™.
2. Launch the app and register for a Hik-Connect user account.
3. Log in Hik-Connect app after registration.
5.3 Adding Speed Dome to Hik-Connect

Before you start:
You need to enable the Hik-Connect service on speed dome before adding it to your Hik-Connect account. Refer to Section 5.1 Enable Hik-Connect Service on Speed Dome.

Steps:
1. Use a network cable to connect the speed dome with a router if the speed dome does not support Wi-Fi.

![Figure 5-3 Connect a Router]

Note:
After the speed dome connects to the network, wait one minute before any operation on the speed dome using Hik-Connect app.

2. In the Hik-Connect app, tap “+” on the upper-right corner and then scan the QR code of the speed dome to add the speed dome.

You can find the QR code on the speed dome or on the cover of the quick start guide of the speed dome in the package.

![Figure 5-4 Scan QR Code]

Note:
If the QR code is missing or too blur to be recognized, you can also add the speed dome by tapping the icon and inputting the speed dome's serial number.

3. Input the verification code of your speed dome.

Notes:
● The required verification code is the code you create or change when you enabling Hik-Connect service on speed dome.
● If you forget the verification code, you can check the current verification code on Platform Access configuration page via web browser.

4. Follow the prompts to set the network connection and add the speed dome to your Hik-Connect account.
Note:
For detailed information, refer to the user manual of the Hik-Connect app.

5.4 Initializing the Memory Card
Check the memory card status by tapping on the Storage Status in the Device Settings interface.
If the memory card status displays as Uninitialized, tap to initialize it. The status will then change to Normal. You can then start recording any event triggered video in the speed dome such as motion detection.
