Overview

Clear dome outdoor camera housing with heater/blower for SNC-RX550N and SNC-RZ25N cameras

The Sony UNI-ONL7C2 is an outdoor dome housing designed to accommodate Sony's SNC-RX550N and SNC-RZ25N cameras. The housing is completely sealed and features both a built-in heater and blower, keeping the camera protected in extreme temperature conditions. A built-in power adapter supplies power to both the camera and housing. The lower dome is clear for maximum light transmission.

Any weather

Built-in heater and blower and water-tight cable entry. Operating temperature: -20-122°F (-29-50°C) Heater Activates at 60°F (15°C) Built-in heater and blower and water-tight cable entry.

Features

Voltage feed
Integrated 24 V AC to 12V DC power supply for camera operations (electronics not included).

Sturdy
The white top part of the housing is a high-Impact engineered plastic, UV Protected with a UL flame rating of 94V0 and reflective white paint to insulate internal equipment.
