

Model NV-RM 8/10 Rack Panel

Features:

- Ideal for Security monitoring stations or video distribution hubs
- Standard 19" (480mm) wide, 3.5in (90mm) 2U high
- Compact rugged 1/8in (3,5mm) panel with baked epoxy finish
- Supports up to ten individual transceivers or two four-channel devices (not included)
- Mounting hardware included
- Transceivers sold separately

The NV-RM 8/10 Rack Panel allows for the rack mounting of up to ten single-port transceivers, such as the NV-213A, NV-652R, or NV-653T. Alternately, it can support up to two four-port devices, such as the NV-413A, NV-452R, or NV-704J-PVD.

The NV-RM 8/10 can reside on front or rear rails in the same rack as NVT hubs, multiplexers, DVRs, or encoders.

This heavy gauge panel is designed to withstand the mechanical load of multiple coax cables. Threaded holes and screws (included) provide easy transceiver mounting, and installation into a 19" rack.
