IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean the contaminated area on the product surface with a soft, dry cloth or a damp cloth. (Do not use a detergent or cosmetic products that contain alcohol, solvents or surfactants or oil constituents as they may deform or cause damage to the product.)
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. This product is intended to be supplied by Power Unit marked “Class 2” or “LPS” and rated 24 Vac (50 or 60 Hz), min. 1.6 A or PoE (42.5V – 57V), min. 0.7 A (QNP-6230).
16. This product is intended to be supplied by Power Unit marked “Class 2” or “LPS” and rated 24 Vac (50 or 60 Hz), min. 2.9 A or PoE (42.5V – 57V), min. 0.9 A (QNP-6230H).
17. Do not install the camera vertically on a wall. This will cause Tilt step-out.
18. If you use excessive force when installing the product, the camera may be damaged and malfunction. If you forcibly install the product using non-compliant tools, the product may be damaged.
19. Do not install the product in a place where chemical substances or oil mist exists or may be generated. As edible oils such as soybean oil may damage or warp the product, do not install the product in the kitchen or near the kitchen table.
   This may cause damage to the product.
20. When installing the product, be careful not to allow the surface of the product to be stained with chemical substance. Some chemical solvents such as cleaner or adhesives may cause serious damage to the product’s surface.
21. If you install/disassemble the product in a manner that has not been recommended, the production functions/performance may not be guaranteed.
   Install the product by referring to “Installation & connection” in the user manual.
22. Installing or using the product in water can cause serious damage to the product.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY METALLIC OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.
Apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on the apparatus.
To prevent injury, this apparatus must be securely attached to the Wall/ceiling in accordance with the installation instructions.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
Class I construction
An apparatus with CLASS I construction shall be connected to a MAINS socket outlet with a protective earthing connection.

Battery
Batteries (battery pack or batteries installed) shall not be exposed to excessive heat such as sunshine, fire or the like.

Disconnection Device
Disconnect the main plug from the apparatus, if it's defected. And please call a repair man in your location.

When used outside of the U.S., it may be used HAR code with fittings of an approved agency is employed.

CAUTION
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.

ATTENTION
IL Y A RISQUE D’EXPLOSION SI LA BATTERIE EST REMPLACÉE PAR UNE BATTERIE DE TYPE INCORRECT.
METTRE AU REBUT LES BATTERIES USAGÉES CONFORMÉMENT AUX INSTRUCTIONS.

These servicing instructions are for use by qualified service personnel only.
To reduce the risk of electric shock do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.
The CVBS out terminal of the product is provided for easier installation, and is not recommended for monitoring purposes.

Please use the input power with just one camera and other devices must not be connected.
The ITE is to be connected only to PoE networks without routing to the outside plant.
The wired LAN hub providing power over the Ethernet (PoE) in accordance with IEEE 802-3af shall be a UL Listed device with the output evaluated as a Limited Power Source as defined in UL60950-1.

Unit is intended for installation in a Network Environment 0 as defined in IEC TR 62102.
As such, associated Ethernet wiring shall be limited to inside the building.

Please read the following recommended safety precautions carefully.
• Do not place this apparatus on an uneven surface.
• Do not install on a surface where it is exposed to direct sunlight, near heating equipment or heavy cold area.
• Do not place this apparatus near conductive material.
• Do not attempt to service this apparatus yourself.
• Do not place a glass of water on the product.
• Do not install near any magnetic sources.
• Do not block any ventilation openings.
• Do not place heavy items on the product.
• Please wear protective gloves when installing/removing the camera. The high temperature of the product surface may cause a burn.

User’s Manual is a guidance book for how to use the products.
The meaning of the symbols are shown below.
• Reference : In case of providing information for helping of product’s usages
• Notice : If there’s any possibility to occur any damages for the goods and human caused by not following the instruction
★ Please read this manual for the safety before using of goods and keep it in the safe place.
PRODUCT FEATURES

• Dustproof/Waterproof (IP66) (QNP-6230H)
  The dustproof and waterproof design makes you feel at ease when installing the product outdoors or exposing it to rain.

• Full HD video support

• Multi-Streaming
  This network camera can display videos in different resolutions and qualities simultaneously using different CODECs.

• Web Browser-based Monitoring
  Using the Internet web browser to display the image in a local network environment.

• Alarm
  When an event occurs, video is either sent to the email address registered by the user, sent to the FTP server, saved in a Micro SD card or NAS, or a signal is sent to the alert output terminal.

• Tampering Detection
  Detects tempering attempts on video monitoring.

• Motion Detection
  Detects motion from the camera’s video input.

• Smart Codec
  Adapatively applies codecs for a portion of the camera’s field of view to improve the quality of such area specified by user.

• Auto Detection of Disconnected Network
  Detects network disconnection before triggering an event.

• ONVIF Compliance
  This product supports ONVIF Profile S&G.
  For more information, refer to www.onvif.org.

RECOMMENDED PC SPECIFICATIONS

• CPU : Intel(R) Core(TM) i7 3.4 GHz or higher
• RAM : 8G or higher
• Supported OS : Windows 7, 8.1, 10, Mac OS X 10.10, 10.11, 10.12
• Plug-in free web viewer
  Supported web browsers : Google Chrome 63, MS Edge 41, Mozilla Firefox 57 (Window 64bit only), Apple Safari 11 (Mac OS X only)
• Plug-in Webviewer
  Supported web browsers : MS Explore 11, Apple Safari 11 (Mac OS X only)

RECOMMENDED MICRO SD/SDHC/SDXC MEMORY CARD SPECIFICATIONS

• Recommended capacity : 16GB to 256GB (MLC type)
• The following types of memory cards from the following manufacturers are recommended for this camera.
  - Manufacturer : SanDisk, Transcend
  - Product family : High endurance

NAS RECOMMENDED SPECS

• Recommended capacity : 200GB or higher is recommended.
• Simultaneous access : One unit of NAS can accept a maximum of sixteen camera accesses.
• For this camera, you are recommended to use a NAS with the following manufacturer’s specs.

<table>
<thead>
<tr>
<th>Recommended products</th>
<th>Available sizes</th>
</tr>
</thead>
<tbody>
<tr>
<td>QNAP NAS</td>
<td>A maximum of 16 cameras can access simultaneously.</td>
</tr>
<tr>
<td>Synology NAS</td>
<td>A maximum of 16 cameras can access simultaneously.</td>
</tr>
</tbody>
</table>

⚠️ If you use NAS equipment for purposes other than video saving, the number of accessible cameras may be reduced.
### WHAT’S INCLUDED (QNP-6230)

Please check if your camera and accessories are all included in the product package. (As for each sales country, accessories are not the same.)

- **GND**: Ground
- **IN3**: Input 3
- **IN4**: Input 4
- **2.COM**: COM 2
- **2.NO**: NO 2
- **2.NC**: NC 2
- **AC-**: AC negative
- **FG**: Forward ground
- **AC+**: AC positive
AT A GLANCE (QNP-6230H)

**Appearance**

1. Safety Cable
   - The cable prevents the product from dropping during installation.

2. Housing
   - Protects the internal PTZ mechanism from the direct sunlight, rain or external impact.

3. Dome Cover
   - Dome cover for the lens and unit protection.

4. Micro SD Memory Card Compartment
   - Compartment for the Micro SD memory card.

5. Reset Button
   - Pressing and holding this button for about 5 seconds will reset all camera settings to the factory default.

**Inside**

**Bottom View of Installation Base**

- **1** Communications Ports
  - Used for RS-485 communications.

- **2** Audio Input Port
  - Used to connect the audio input cable.

- **3** Audio Output Port
  - Used to connect the audio output cable.

- **4** Video Out Port
  - Analog video output port. (for installation)

- **5** Alarm I/O Port
  - Used to connect the alarm I/O cable.

- **6** Communications Setup Switch
  - Set communication protocol (RS-485) and indicate whether to terminate.

- **7** Network Connections
  - Port for connection with the network using an Ethernet cable.

- **8** Power Port
  - Used to connect the power.
**Installation & Connection**

- **Camera Wiring Interface Board**
  For the camera wiring, please refer to the picture below.

![Camera Wiring Diagram]

- **Select Normal Open in the setup menu.**
  - The sensor input is activated during a short for contact type, or when it is at “Low” level for the active type.

- **Select Normal Close from the Setup menu.**
  - The sensor input is activated when open for the contact type or when in high impedance state (open collector) for the active type.

- The maximum capacity of the alarm output terminal is 30V DC/2A, 125V AC/0.5A and 250V AC/0.25A.

- When connecting alarm input and output cables, be sure to connect one cable to each terminal respectively.

- To connect products over the camera’s capacity, please use an additional relay device.

- If power and GND cables are connected inappropriately to the NC/NO or COM port, a fire or breakdown of equipment may occur.

---

**Connecting with Other Device**

**Preparing Adapter and Cable**

- Connect the camera to the power adaptor. Then, plug the power cord of the adaptor to the wall outlet.

  ![Power Adaptor and Cable Diagram]

- Check out the rated voltage and current before making connections.

<table>
<thead>
<tr>
<th>Rated Power</th>
<th>Allowable Input Voltage</th>
</tr>
</thead>
<tbody>
<tr>
<td>AC 24V</td>
<td>AC22V~26V</td>
</tr>
<tr>
<td>PoE+</td>
<td>42.5Vdc~57Vdc</td>
</tr>
</tbody>
</table>

- If applied with both PoE+ and AC 24V power supplies, the device is powered from the first engaged supply.
  - It is preferred to use single power supply of either one of PoE+ and AC 24V.

- If connected to a switch device that provides PoE+ power, you don’t need to apply a power source of AC 24V supply.

- Make sure the PoE device suffices PoE+ (IEEE 802.3at) specifications.
  - If your device is connected to the switch with the standard of PoE (IEEE 802.3af), then go to the switch setup menu to “deactivate PoE”.
  - For further information on switch device, refer to the manufacturer’s manual.
  - It is recommended to use a cable that complies with the PoE+ spec.

- If you use a PoE+ as a power, the boot time may vary depending on a switch model (by channel) or a maker (as PoE+ connection time is included.).

- The heater doesn’t work with the PoE+ power supply. (QNP-6230H)
Electrical Resistance of Copper Wire at [20°C (68°F)]

</tr>
</tbody>
</table>

- As shown in the table above, you may encounter a voltage-sag depending on the wire length. If you use an excessively long wire for camera connection, the camera may not work properly.
  - Camera Operating Voltage: AC 24V±10%
  - Voltage drop measurements on the chart above may vary depending on the type and manufacture of the copper cable.

### Ethernet Connection

Connect the Ethernet cable to the local network or to the Internet.

### Connecting the installation monitor

Connect the cable to the camera’s rear video output terminal and the installation monitor’s video input terminal.

![Monitor connection diagram]

- The wiring varies depending on your monitor type and peripheral devices; please refer to the user manual for each device.
- Please make sure the monitor and camera are turned off when connecting them.

- This product is a network camera that transfers video over a network; the video output terminal is used to set the imaging range of the camera at installation.
  - Using the terminal for monitoring purposes may cause problems such as degradation in video quality.
  - It is not suitable for 24-hour monitoring using professional CRT monitors or TFT/LCD portable monitors.
  - Use the network transfer screen for 24-hour monitoring and storage.

### INSTALLATION

#### Preparing & Installing Camera Bracket

For installation guidelines for brackets and housings, refer to the installation manual that is enclosed with the bracket or housing.

- See “Optional Accessories for Installation” for the appearance of each bracket (unbundled). (page 15)
Installing by surface attachment (QNP-6230)

- QNP-6230H cannot be installed on the surface of a wall or ceiling.

- Attaching Template & Installing installation base

1. Attach the provided template on the ceiling. Based on the template, drill a 86mm hole in the ceiling and arrange the wires through the hole.
2. Install installation base as shown.
3. Before installing the exposed bracket, open the hinged door at the bottom of the bracket as shown in the picture. Hold the knob on the hinged door to open it.

- In the case of installing the camera at highly humid place, install it on the ceiling after attaching the enclosed insulation sheet on the back of install base.

- Connect Terminal Wires

1. Connect the cables to the terminal block on the hinged door. Refer to “Camera Wiring Interface Board”. (page 10)
2. Once the wiring is complete, close the hinged door.

- Connecting Camera Safety Cable and Attaching Camera

1. First, as shown in the left hand picture, pull out the safety cable from the base and then hook it to the mount. The safety cable is coiled inside the base.
   - To attach the camera to the mount, refer to the alignment guide marks as shown in the picture.
2. Carefully attach the camera to the mount following the alignment guide marks as shown in the picture.

- Make sure to hook the camera’s safety cable to the mount before proceeding. Otherwise you may be exposed to serious injury caused by the camera falling.
- To attach or detach the camera, refer to the picture.
  - Attaching the Camera : Push up the camera unit and rotate it clockwise until it cannot be rotated anymore, as shown in the figure. After rotation, fasten the screws assembled to the install base.

  ![Attaching the Camera](image1)

  ![To Attach the Camera](image2)

  - Detaching the Camera : Unfasten the screws as shown in the figure, push in the hook, and rotate it counterclockwise. (The screws are not completely disassembled.) When the hook does not rotate any more, pull down the camera unit and separate it.

  ![Detaching the Camera](image3)

  ![To Detach the Camera](image4)

- Installing by wall mount (QNP-6230H)

  - Fix the installation base with the bracket

  1. Fix the base with the bracket by turning it clockwise.

  ![Installing by wall mount](image5)

  2. As shown in the picture below, gently press and lift up the handle of the hinged door on the bottom of the installation base. Please refer to the “Camera Wiring Interface Board” on page 10, connect the wires.

  ![Installing by wall mount](image6)

  - Do not connect the camera to a power outlet until the installation is complete. Supplying power while the installation is in progress may cause fire or damage the product.

  ![Installing by wall mount](image7)

- Check cable connection method and install.

  - Note that BUSHINGS are provided for outdoor installations where exposed to a moisture condition through the PIPE or MOUNT, install the HOUSING using the BUSHING to prevent moisture entering.

    - Apply grease of proper dose on the BUSHING before assembling, and run cables through each hole of the bushings. Use PINS to stop up empty holes having no cable running.

    - Assemble the BUSHING to the top side of HOUSING’s inside as shown in the diagram below. At the moment, apply pressure evenly on the BUSHING to secure it tightly to the HOUSING as shown in the diagram.
3. Connect the camera safety wire to the installation base.

4. Assemble Camera and Installation Base
   Assemble the installation base and camera by matching the installation direction guides.

5. Attach Camera
   Rotate the mounted camera unit clockwise so that the reference indicators of top and bottom are as shown in the image on the right.

6. Secure Camera and Installation Base
   As shown in the picture below, secure the installation base and camera using hexagon screw.
Notes for Waterproofing

- Installing the unit on the wall by combining the outdoor housing and wall mount

1. Install the wall mount on the vertical wall. If the mount is installed on an inclined wall, moisture can penetrate inside the outdoor housing through the external cable.
2. Wrap the screw part of the housing with a sufficient amount of Teflon tape for assembly.
3. When separating the dome cover and fastening it to the housing frame, make sure that the gasket is not loosened to separate from the dome cover.
4. Install the wall mount adapter for waterproofing, and apply the silicon sealant between and around the wall and wall mount for sealing.

เตะ particular caution to ensure that there is proper sealing if the installed side is not flat.

- Installing on the wall by combining the outdoor housing and ceiling mount adapter

1. Wrap the screw part of the housing with a sufficient amount of Teflon tape for assembly.
2. When separating the dome cover and fastening it to the housing frame, make sure that the gasket is not loosened to separate from the dome cover.
3. Install the ceiling mount adapter for waterproofing, and apply the silicon sealant between and around the wall and ceiling mount for sealing.

เตะ particular caution to ensure that there is proper sealing if the installed side is not flat.

Optional Accessories for Installation

For your easier installation, you can purchase appropriate optional accessories available.

1. If installing the camera on the wall
   - Wall mount (SBP-300WM1)

2. If installing the camera on the ceiling
   - Ceiling Mount (SBP-300CM)

3. If installing the wall mount (SBP-300WM/SBP-300WM1) on an at least 80mm-long cylinder
   - Pole Mount (SBP-300PM)
4. If installing the wall mount (SBP-300WM/SBP-300WM1) on a corner of the wall
   • Corner Mount (SBP-300KM)

5. If installing on a building rooftop
   • Parapet Mount (SBP-300LM)

6. If installing QNP-6230 outdoors
   • Outdoor Housing (SHP-3701H)

7. If installing QNP-6230 on a ceiling as built-in component
   • Flush-Mount Indoor Housing for PTZ Dome Camera (SHP-3701F)

8. If installing QNP-6230 in the wall mount or ceiling mount
   • Hanging Mount (SBP-301HM3)
INSERTING/REMOVING A MICRO SD MEMORY CARD

1. Disconnect the power cable from the camera before inserting the Micro SD memory card.
   - Do not insert the Micro SD memory card while it’s upside down by force. Otherwise, it may damage the Micro SD memory card.
   - When it rains or the humidity is high, insertion or ejection of a Micro SD card is not recommended.
   - Disassembly of the product cover should be finished within 5 minutes, or there will be the risk of internal dew condensation.

Inserting a Micro SD Memory Card

1. Open the cover in the rear of the camera. (QNP-6230)

   Using the screw driver, loosen screw by turning them counterclockwise and separate the dome cover. (QNP-6230H)

2. Push the Micro SD memory card in the direction of the arrow shown in the diagram.

   Do not insert the Micro SD memory card while it’s upside down by force. Otherwise, it may damage the Micro SD memory card.

Removing a Micro SD Memory Card

Gently press down on the exposed end of the memory card as shown in the diagram to eject the memory card from the slot.

- Pressing too hard on the Micro SD memory card can cause the card to shoot out uncontrollably from the slot when released.
- Before removing the micro SD memory card, turn off the camera or set the device to <Off> in <Storage> and press the [Apply] button.
- If you turn off the camera or remove the Micro SD memory card that contains data from the product, the data may be lost or damaged.
You can set up the network settings according to your network configurations.

**CONNECTING THE CAMERA DIRECTLY TO LOCAL AREA NETWORKING**

Connecting to the camera from a local PC in the LAN

1. Launch an Internet browser on the local PC.
2. Enter the IP address of the camera in the address bar of the browser.

A remote PC in an external Internet out of the LAN network may not be able to connect to the camera installed in the intranet if the port-forwarding is not properly set or a firewall is set. In this case, to resolve the problem, contact your network administrator.

- In the IP installer, you can use the initial password, "4321" to set IP Address, Subnet Mask, Gateway, HTTP Port, VNP Port, IP type. After changing the network interface, for better security, access the web viewer and change the password.
- By factory default, the IP address will be assigned from the DHCP server automatically. If there is no DHCP server available, the IP address will be set to 192.168.1.100.
  To change the IP address, use the IP Installer.
  For further details on IP Installer use, refer to "Static IP Setup". (Page 20)

**CONNECTING THE CAMERA DIRECTLY TO A DHCP BASED DSL/CABLE MODEM**

1. Connect the user PC directly with the network camera.
2. Run the IP Installer and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port], and set the IP type to [DHCP].
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

- For information on how to set DDNS, refer to the online help of Web Viewer.
- For information on how to set the IP format, refer to the online help of Web Viewer.
1. Connect the user PC directly with the network camera.
2. Run the IP Installer and change the IP address of the camera so that you can use the web browser on your desktop to connect to the Internet.
3. Use the Internet browser to connect to the web viewer.
6. Move to [Basic] – [IP & Port] Setup Page, set the IP type to [PPPoE], and enter the network service’s ID and password.
7. Connect the camera, which was removed from your PC, directly to the modem.
8. Restart the camera.

For information on how to set DDNS, refer to the online help of Web Viewer.

For information on how to set the IP format, refer to the online help of Web Viewer.

CONNECTING THE CAMERA TO A BROADBAND ROUTER WITH THE PPPoE/CABLE MODEM

This is for a small network environment such as homes, SOHO and ordinary shops.

Configuring the network settings of the local PC connected to a Broadband Router

Configuring the network settings of the local PC connected to a Broadband Router, follow the instructions below:

- Select: <Network> → <Properties> → <Local Area Connection> → <General> → <Properties> → <Internet Protocol (TCP/IP)> → <Properties> → <Obtain an IP address automatically> or <Use the following IP address>.
- Follow the instructions below if you select <Use the following IP address>:
  ex1) If the address (LAN IP) of the Broadband Router is 192.168.1.1
    IP address: 192.168.1.100
    Subnet Mask: 255.255.255.0
    Default Gateway: 192.168.1.1
  ex2) If the address (LAN IP) of the Broadband Router is 192.168.0.1
    IP address: 192.168.0.100
    Subnet Mask: 255.255.255.0
    Default Gateway: 192.168.0.1
  ex3) If the address (LAN IP) of the Broadband Router is 192.168.xxx.1
    IP address: 192.168.xxx.100
    Subnet Mask: 255.255.255.0
    Default Gateway: 192.168.xxx.1

For the address of the Broadband Router, refer to the product’s documentation.

For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup”. (Page 22)
1. Select a camera in the search list. Check the MAC address of the camera on the camera’s label. Both the [Auto Set] and [Manual Set] buttons will be activated.

2. Click [Manual Set]. The Manual Setting dialog appears. [IP Address], [Subnet Mask], [Gateway], [HTTP Port], and [VNP Port] of the camera are displayed in the preset values.

3. In the [Address] pane, provide the necessary information.
   - MAC (Ethernet) Address: The MAC address imprinted on the camera label is automatically displayed and requires no user setting.
   - IP related parameters can be set only when DHCP is not checked.

For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.
If not using a Broadband Router

For setting <IP Address>, <Subnet Mask>, and <Gateway>, contact your network administrator.

4. In the <Port> pane, provide necessary information.
   • HTTP Port : Used to access the camera using the Internet browser, defaulted to 80.
   • VNP Port : Used to control the video signal transfer, defaulted to 4520.

5. Enter the password.
Enter the password of “admin” account, which was used to access the camera.

   • For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   • For information on how to change the password, refer to the online help of Web Viewer.

6. Click [OK].
Manual network setup will be completed.

If using a Broadband Router

• IP Address : Enter an address falling in the IP range provided by the Broadband Router.
ex) 192.168.1.2–254, 192.168.0.2–254, 192.168.XXX.2–254

• Subnet Mask : The <Subnet Mask> of the Broadband Router will be the <Subnet Mask> of the camera.

• Gateway : The <Local IP Address> of the Broadband Router will be the <Gateway> of the camera.

   • The settings may differ depending on the connected Broadband Router model.
   For more information, refer to the user manual of the applicable router.
   • For more information about port forwarding of the broadband router, refer to “Port Range Forward (Port Mapping) Setup”. (Page 22)

If the Broadband Router has more than one camera connected

Configure the IP related settings and the Port related settings distinctly with each other.
ex)

<table>
<thead>
<tr>
<th>Category</th>
<th>Camera #1</th>
<th>Camera #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP related settings</td>
<td>IP Address</td>
<td>192.168.1.100</td>
</tr>
<tr>
<td>Subnet Mask</td>
<td>255.255.255.0</td>
<td>255.255.255.0</td>
</tr>
<tr>
<td>Gateway</td>
<td>192.168.1.1</td>
<td>192.168.1.1</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Port related settings</th>
<th>HTTP Port</th>
<th>VNP Port</th>
</tr>
</thead>
<tbody>
<tr>
<td>Camera #1</td>
<td>8080</td>
<td>4520</td>
</tr>
<tr>
<td>Camera #2</td>
<td>8081</td>
<td>4521</td>
</tr>
</tbody>
</table>

   • If the <HTTP Port> is set other than 80, you must provide the <Port> number in the address bar of the Internet browser before you can access the camera.
ex) http://IP address : HTTP Port
http://192.168.1.100:8080

Auto Network Setup

Run <IP Installer_v2.XX.exe> to display the camera search list.
At the initial startup, both [Auto Set] and [Manual Set] will be grayed out.

   • For cameras found with the IPv6 setting, these buttons will be grayed out as the cameras do not support this function.

1. Select a camera in the search list.
Check the MAC address of the camera on the camera’s label.
Both the [Auto Set] and [Manual Set] buttons will be activated.

2. Click [Auto Set].
The Auto Setting dialog appears.
The <IP Address>, <Subnet Mask>, and <Gateway> will be set automatically.

3. Enter the password.
Enter the password of “admin” account, which was used to access the camera.

   • For the security purposes, you are recommended to use a combination of numbers, alphabets uppercase and lowercase and special characters for your password.
   • For information on how to change the password, refer to the online help of Web Viewer.

4. Click [OK].
Auto network setup will be completed.
**Dynamic IP Environment Setup**

- Example of the Dynamic IP environment
  - If a Broadband Router, with cameras connected, is assigned an IP address by the DHCP server
  - If connecting the camera directly to modem using the DHCP protocols
  - If IPs are assigned by the internal DHCP server via the LAN

**Checking the Dynamic IP**

1. Run the IP Installer on the user’s local computer. Cameras allocated with Dynamic IP address are shown in the list.
2. Select a camera from the search result.
3. Click the [Manual Set] button and check the camera’s Dynamic IP address. If you uncheck DHCP, you can change IP to Static.

**PORT RANGE FORWARD (PORT MAPPING) SETUP**

If you have installed a Broadband Router with a camera connected, you must set the port range forwarding on the Broadband Router so that a remote PC can access the camera in it.

**Manual Port Range Forwarding**

1. From the Setup menu of the Broadband Router, select <Applications & Gaming> - <Port Range Forward>. For setting the port range forward for a third-party Broadband Router, refer to the user guide of that Broadband Router.
2. Select <TCP> and <UDP Port> for each connected camera to the Broadband Router. The number of each port to be configured to the IP router should be set according to the port number designated in <Setup> - <Basic> - <IP & Port> on the camera web viewer.

3. When done, click [Save Settings]. Your settings will be saved.

- Above sample instructions are based on the CISCO’s Broadband Router.
- The settings may differ depending on the connected Broadband Router model. For more information, refer to the user manual of the applicable router.

**Setting up Port Range Forward for several network cameras**

- You can set a rule of Port Forwarding on the Broadband Router device through its configuration web page.
- A user can change each port using the camera setting screen.

When Camera1 and Camera2 are connected to a router:

![Port Range Forwarding Table]

- Port forwarding can be done without additional router setup if the router supports the UPnP (Universal Plug and Play) function. After connecting the network camera, select the checkbox from the menu <Quick connect> in <Wisenet DDNS> in “Settings” > “Network” > “DDNS”.
CONNECTING TO THE CAMERA FROM A SHARED LOCAL PC

1. Run the IP Installer.
   - It will scan for connected cameras and display them as a list.
2. Double-click a camera to access.
   - The Internet browser starts and connects to the camera.

- Access to the camera can also be gained by typing the camera’s IP address in the address bar of the Internet browser.

CONNECTING TO THE CAMERA FROM A REMOTE PC VIA THE INTERNET

Since using the IP Installer on a remote computer that is not in the Broadband Router’s network cluster is not allowed, users can access cameras within a Broadband Router’s network by using the camera’s DDNS URL.

1. Before you can access a camera in the Broadband Router network, you should have set the port range forward for the Broadband Router.
2. From the remote PC, launch the Internet browser and type the DDNS URL address of the camera, or the IP address of the Broadband Router in the address bar.
   - ex) http://ddns.hanwha-security.com/ID

- For information on how to register DDNS, refer to the network setup guide.
CONNECTING TO THE CAMERA

Normally, you would

1. Launch the Internet browser.
2. Type the IP address of the camera in the address bar.
   - IP address (IPv4) : 192.168.1.100 ➔ http://192.168.1.100
     - the Login dialog should appear.

If the HTTP port is other than 80

1. Launch the Internet browser.
2. Type the IP address and HTTP port number of the camera in the address bar.

Using URL

1. Launch the Internet browser.
2. Type the DDNS URL of the camera in the address bar.
   - URL address : http://ddns.hanwha-security.com/ID
     - the Login dialog should appear.

- Network connection is disabled in the LAN only environment.

Connecting via UPnP

1. Run the client or operating system in support of the UPnP protocol.
2. Click the camera name for search.
   - The login window is displayed.

To check the DDNS address

If the camera is connected directly to the DHCP cable modem, DSL modem, or PPPoE modem, the IP address of your network will be changed each time you try to connect to the ISP (Internet Service Provider) server.

If this is the case, you will not be informed of the IP address changed by DDNS.

Once you register a dynamic IP-based device with the DDNS server, you can easily check the changed IP when you try to access the device.

To register your device to the DDNS server, visit http://ddns.hanwha-security.com and register your device first, and then set the Web Viewer’s Network - DDNS to Wisenet DDNS, as well as providing Product ID that had been used for DDNS registration.
PASSWORD SETTING
When you access the product for the first time, you must register the login password.
When the “Password change” window appears, enter the new password.

- For a new password with 8 to 9 digits, you must use at least 3 of the following: uppercase/lowercase letters, numbers and special characters. For a password with 10 to 15 digits, you must use at least 2 types of those mentioned.
  - Special characters that are allowed: ~`!@#$%^*()_-+=|{}[].?
- For higher security, you are not recommended to repeat the same characters or consecutive keyboard inputs for your passwords.
- If you lost your password, you can press the [RESET] button to initialize the product. So, don’t lose your password by using a memo pad or memorizing it.

LOGIN
Whenever you access the camera, the login window appears. Enter the User ID and password to access the camera.

1. Enter “admin” in the <User name> input box.
   The administrator ID, “admin”, is fixed and can not be changed.
2. Enter the password in the <Password> input field.
3. Click [OK].
   If you have logged in successfully, you will the Live Viewer screen.
- When you access the camera web viewer, pay special attention to the security by checking whether the image data is encrypted.
- If you check the “Remember my credentials” option when your input is done, in future you will be logged in automatically without being prompted to enter the login information.
- You will experience the best video quality if the screen size is 100%. Reducing the ratio may cut the image on the borders.

PLUG-IN SUPPORT SPECIFICATIONS FOR EACH BROWSER
The existing plug-in web viewer and a new plug-in free web view is embedded together. This allows you to use the web viewer in newer browser environments that do not support plug-ins, such as Chrome, EDGE and FireFox (Windows 64-bit only). For browsers that allow the installation of plug-ins, such as IE and Safari, installing the plug-in is recommended.

According to the browser environment, the following differences may be observed.

- **Chrome, FireFox(Windows 64bit only), EDGE browser**: Although they don’t support plug-ins, you can use a web viewer as a plug-in free web viewer is embedded.
  - As the plug-in free webviewer has lower performance than the plug-in webviewer, it has a limit on the monitoring of high quality profiles and playback of saved videos.
    To monitor high quality profiles and play saved videos, use either a plug-in webviewer or SmartViewer.
  - Plugin-free webviewer creation conditions: The selected profile exceeds MJPEG Full HD 10fps H.265 FullHD 10fps 2Mbps or higher
  - The plug-in free feature has been optimized for the Chrome browser.
  - Supports Adaptive Streaming
    - This is the feature that automatically lowers the profile if there is a delay of more than 5 seconds. It was made to prevent issues such as increased latency and no response from the browser when playing the video on a system with lower hardware specifications than recommended.
    The video profile is reduced in the following sequence: 1920X1080(20fps) -> 1280X720(20fps) -> 640X480(20fps).

- **IE, Safari browser**: You can use a web viewer even if you don’t install the existing plug-in web viewer.
  - To monitor/play saved video seamlessly, you are required to install a plug-in.
**INSTALLING WebViewer PLUGIN**

To access to the plug-in webviewer and play a live video (H.264/H.265) or a recorded video, an installation message will be prompted. At this time you need to install the webviewer plug-in to use the function properly.

1. When the monitoring page is accessed for the very first time, the installation page is displayed. Click [Download plugin] to begin installation.
   - If the plug-in installation file download status is suspended at 99% in the Internet Explorer browser, retry it after selecting “Release SmartScreen filter” in “Tool → SmartScreen filter”.

2. Click [Run] in the message window.
3. Click [Yes] when the notice window saying that all browser windows will be closed.
   - Steps 4 and 5 will be skipped if no Web Viewer Plug-in is installed.

4. When the old version of the Web Viewer Plug-in is installed, a notice window saying the old version will be deleted is displayed. Click [Yes] when the notice window is displayed.
5. Click [OK].
   - The old version of Web Viewer Plug-in is deleted.
6. Click [Install] to begin installation of the Web Viewer Plug-in.
7. Click [Finish].
   - Web Viewer Plug-in installation is completed.

- In your internet explorer, if you need to move to the installation screen after installing the webviewer plugin, check whether webvieweractivexplugin_lib.control in the “Tool → Additional Function Management” menu is “Activated”. If not, and if there is a persistent problem, then select “Tools → Internet Options → General” and delete all the search records.
  - If the problem persists, please register the IP or Domain of your camera in “Tools → Internet Options → Security → Trusted sites”.

**USING A PLUG-IN FREE WEBVIEWER**

Although it is not possible to install plug-ins separately if you access the camera from Google Chrome, Mozilla Firefox, or the MS Edge web browser, you can view and control the camera video without installing plug-ins.

1. Enter your username and password to log in.
2. When you are logged in, a camera live view screen appears.

**To set the camera**

1. Click the [Setup ( )) icon.
2. The Settings window appears.
3. It is possible to manage the settings of the camera's basic information, PTZ, video and audio, network, event, analysis, system, and open platform via the network.
4. Click <Help ( )> to view detailed descriptions of each function.
DIP SWITCH SETTING

How to set up Protocols and ID DIP Switches

You can control various settings of the camera system using the Communication and ID DIP switches. Before installing the product, please set up the DIP switches according to the installation environment.

1. Set the switches according to your installation environment. For more detailed setup information, please refer to the chart on the next page.
2. The camera may malfunction if the switches are not fully turned On/Off; please double check the switches before finishing setup.
3. Be cautious that the switch can be damaged when it is operated with a sharp tool.
4. Be cautious that the switch can be damaged when it is operated with an excessive force.

CAMERA WIRING

Control Signal Connection

• RS-485 Communications

Communications Cable

For the camera to communicate with the controller, a RS-485 communications line is required.

- A 30m or shorter length is recommended for the connection.
- The communication cable is not enclosed with the camera.

## Alarm I/O
- Input 4ea / Output 2ea (Relay type)

## Alarm Triggers
- Alarm Input, Motion Detection, Video & Audio Analytics, Network Disconnect

## Alarm events
- File upload via FTP, E-Mail
- Notification via E-Mail, TCP, HTTP
- Local (SD/SDHC/SDXC) or NAS recording at Event (Alarm Triggers)
- External output
- Preset

## Audio In
- Selectable (Mic IN/Line IN)
- Supply voltage: 2.5VDC(4mA), Input impedance: approx. 2K Ohm

## Audio Out
- Line out (3.5mm mono jack), Max output level: 1 Vrms

## Pixel Counter
- Support

## Ethernet
- RJ-45 (10/100BASE-T)

## Video Compression Format
- H.264 (MPEG-4 Part 10/AVIC, H.265, Motion JPEG

## Resolution
- 1920x1080 / 1280x1024 / 1280x960 / 1024x768 / 800x600 / 800x448 / 720x576 / 720x480 / 640x480 / 640x360 / 320x240

## Max. Framerate
- H.264/H.265 : Max. 30fps at all resolutions
- Motion JPEG : Max. 30fps at all resolutions

## Smart Codec
- Manual mode (Area-based : 5ea)

## WiseStream II
- Support

## Video Quality Adjustment
- H.264 / H.265 / MJPEG : Target Bitrate Level Control

## Bitrate Control Method
- H.264/H.265 : CBR or VBR
- Motion JPEG : VBR

## Streaming Capability
- Multiple Streaming (Up to 10 Profiles)

---

# Network

## Audio Compression Format
- G.711 µ-law / G.726 Selectable
- G.726 (ADPCM) 8KHz, G.711 8KHz
- G.726 : 16Kbps, 24Kbps, 32Kbps, 40Kbps
- AAC-LC : 48Kbps at 16KHz

## Audio Communication
- Bi-directional (2-Way)

## Protocol
- TCP/IP, UDP/IP, RTP/UDP, RTCP, RTSP, NTP, HTTP, HTTPS, SSL/TLS, DHCP, PPPoE, FTP, SMTP, ICMP, IGMP, SNMPv1/v2c/v3(MIB-2), ARP, DNS, DDNS, QoS, PIM-SM, UPnP, Bonjour

## Security
- HTTPS(SSL) Login Authentication
- Digest Login Authentication
- IP Address Filtering
- User access Log
- 802.1x Authentication (EAP-TLS, EAP-LEAP)

## Max. User Access
- 10 users at Unicast Mode

## Edge Storage
- Micro SD/SDHC/SDXC 1slot (up to 256 GB)
  - Motion Images recorded in the SD/SDHC/SDXC memory card can be downloaded.
- NAS (Network Attached Storage)
  - Local PC for Instant Recording

## Application Programming Interface
- ONVIF Profile S/G
- SUNAPI 2.0 (HTTP API)
- Wisenet Open Platform

</tr>
</thead>
<tbody>
<tr>
<td>When an Windows 10 user accesses the web viewer through Chrome or Firefox, the sound volume of microphone changes periodically.</td>
<td>• This is what happens when microphone driver has been set to Realtek driver. Install the High Definition Audio device (Windows Default Driver) or the third party driver as the microphone driver.</td>
</tr>
</tbody>
</table>
| No video is displayed when accessing the plug-in free webviewer on Safari via HTTPS. | • On the authentication popup window prompted when initially accessing https, click "View Authentication Certificate" and select the "Always trust when connecting to the designated webviewer IP" check box.  
• If the webviewer continues failing to display a video after you select "Next" on the message window below, press the command key + Q to exit the Safari browser, access again and follow the procedures stated above. |
| I can't access the camera from a web browser.                          | • Check to make sure that the camera's Network settings are appropriate.  
• Check to make sure that all network cables have been connected properly.  
• If connected using DHCP, verify that the camera is able to acquire dynamic IP addresses without any problem.  
• If the camera is connected to a Broadband Router, verify that port forwarding is properly configured. |
| Viewer got disconnected during monitoring.                             | • Connected Viewers become disconnected upon any change to camera or network configurations.  
• Check all network connections.  
• If the camera is connected over an PPPoE network, it's possible for Viewer to disconnect under poor network conditions. |
<p>| The camera connected to the network is not detected in the IP installer program. | • Turn off the firewall settings on your PC and then search the camera again. |
| Images overlap.                                                        | • Check whether two or more cameras are set to a single multicast address instead of different addresses. If a single address is used for multiple cameras, the images may overlap. |
| No image appears.                                                      | • If the transmission method is set to multicast, check whether there is a router that supports multicast in the LAN the camera is connected to. |</p>

<tbody>
<tr>
<td>Voice is not recorded even though audio input settings are configured.</td>
<td>• You must enable the &lt;Audio In&gt; check box in &lt;Basic&gt; - &lt;Video Profile&gt;.</td>
</tr>
<tr>
<td>&lt;Motion detection&gt; of &lt;Analytics&gt; is set to &lt;Enable&gt;, but no notification e-mail reaches me even when an analysis event had occurred.</td>
<td>• Verify the settings in the following sequence:  A. Check &lt;Data &amp; Time&gt; settings.  B. The &lt;Motion detection&gt; should be set to &lt;Enable&gt;.  C. Check if the &lt;E-mail&gt; option of &lt;Event setup&gt; menu is checked to use.</td>
</tr>
<tr>
<td>No signal is found at the Alarm Output port even when an intelligent video analysis event is generated.</td>
<td>• Check alarm output port settings.</td>
</tr>
<tr>
<td>Cannot record into the Micro SD memory card.</td>
<td>• Check if the memory card is defective.</td>
</tr>
<tr>
<td>Micro SD memory card is inserted but the camera does not operate properly.</td>
<td>• Check if the memory card is inserted in the proper direction. Operation of memory card that is formatted by other devices is not guaranteed with this camera unit  • Format the memory card again in &lt;Setup&gt; - &lt;Event&gt; - &lt;Storage&gt; menu.</td>
</tr>
<tr>
<td>Cannot record in the NAS.</td>
<td>• Confirm that the information registered in the NAS is correct.</td>
</tr>
<tr>
<td>It reports that NAS setting has failed.</td>
<td>• Confirm that the IP address of the NAS is valid.  • Confirm that the ID/password of the NAS is valid.  • Confirm that you can access the folder designated as the default folder using the ID of the NAS.  • Confirm that the NAS SMB/CIFS items are unchecked.  • Confirm that the NAS IP address and the camera IP address are in the same format.  ex) The NAS &amp; camera subnet mask initial value is 255.255.255.0. If the IP address is 192.168.20.32 then the NAS IP address should be in the range of 192.168.20.1~192.168.20.255.  • Check whether you tried to access as another user without formatting the default folder saved or used.  • Confirm that you used recommended NAS equipment.</td>
</tr>

OPEN SOURCE ANNOUNCEMENT

GPL/LGPL software license

The software included in this product contains copyrighted software that is licensed under the GPL/LGPL. You may obtain the complete Corresponding Source code from us for a period of three years after our last shipment of this product by sending email to help.cctv@hanwha.com

If you want to obtain the complete Corresponding Source code in the physical medium such as CD-ROM, the cost of physically performing source distribution might be charged.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software—to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation’s software and to any other program whose authors commit to using it. Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead. You can apply it to your programs, too. When we speak of free software, we are referring to freedom, not price. So our license could be considered free software licenses. The terms and conditions of this license are important!

Source code from us for a period of three years after our last shipment of this product by sending email to help.cctv@hanwha.com

You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights. We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

Activities other than copying, distribution and modification are not covered by this License. They are outside its scope. The act of running the Program is not restricted, as a reflects its distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above. The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

Version 2, June 1991 Copyright (C) 1989, 1991 Free Software Foundation, Inc. 51 Franklin St.

This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program", means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and translation.

The authors of the Program have no intention of limiting your freedom except when their own interests directly affect it. Therefore, by distributing the program, running the program, and/or modifying the program, you accept this license. Please read it carefully, because the terms of this license are non-negotiable.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Copyright (C)1989, 1991 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA
component(s) (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable. If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place as distribution of the source code, even through third parties is not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works.

These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program (or works based on it).

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute, or modify the Program subject to those terms and conditions. The terms and conditions for copying, distributing or modifying the Program must be included when you redistirbute the Program either directly or indirectly through public offers to others.

7. No的一种版本或者后续的版本可以作为单独的许可证分发，除非这种单独的许可证包括了与此相关的所有情况下都适用的相同的条件。

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation when you distribute or modify the Program. Such additional or modified terms or conditions may be included in or appended to the license text of the version you are distributing, but you may not add an additional pole of the freedom astronauts". You must do this in such a way that it becomes effective at the start of the source code under any later version of this License. You must ensure that, in these cases, a modified version is named different than the original program name, and in such a way that users in the modified version can choose to ignore that License.

9. You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the Program, if necessary. Here is a sample ; alter the names:

```
Ty Coon, 1 April 1989
Ty Coon, President of Vice
This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is Leithaca youde want to, use the GNU Lesser General Public License instead of this License.
```

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007
Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

The GNU General Public License is a free, copyleft license for software and other kinds of works. The licenses for most software and other practical works are designed to be effective in the most general of circumstances, withoutviolation of privacy rights or the free publication of source code. The GPL applies to many software projects, but not to hardware, and is suitable for都不需要引用任何中间信息。

```
The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work. "Standard Interface" means an interface that is dedicated for standardized communication between packages, but which is not otherwise specified in the document or more complex as a single software entity that contains the complete software product, or that does not run legal notice to the extent that it includes a warranty.

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network. Consequently, You have agreed to abide by this provision in installing the work, and the software license agreement is contractually and legally binding (and not just a permissive offer) provided that You follow these guidelines and supplement the terms of this License with terms:

1. Consent to License Conditions
You must also ensure that these additional terms comply with section 10, in this case, without any restrictions on conveying the work to the recipient of the work. You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy of the work does not require acceptance. No additional permissions are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. Additional permissions may be written in a manner consistent with section 10, in this case, without any restrictions on conveying the work to the recipient of the work. **Mozilla Public License**

Since we, as Haneiele Teshinwi, used the Mozilla Firefox component without modifying the source code according to the Mozilla Public License 1.1, we are not obliged to provide the source code of the corresponding component.

### Version 1.1

#### 1. Definitions.

1.0.1. "Commercial Use" means distribution or otherwise making the Covered Code available to a third party.

1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the version of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.

1.6. "Licensable by grantor." means having the right to, grant, to the maximum extent possible, whether at the time of the Initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.7. "Licensable by contributor" means having the right to, grant, to the maximum extent possible, whether at the time of the Initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.8. "Modifications" means any addition or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.

B. Any new file that contains any part of the Original Code or previous Modifications.

1.9. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.

1.10. "Patent Claims" means any patent claim(s), new owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.1.1. “Source Code” means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or source code differential comparisons against either the Original Code or another well-known, available Covered Code of the contributor’s choice. The Source Code can be in a compressed or archived form, provided the appropriate decompression or decompression software is available and described in detail in the distribution of the Source Code.

1.2. “You” (or “Your”) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License, or a future version of this License issued to you by the Initial Developer or by the Contributor under which such terms You are bound.

1.3. “Your Original Code” means the Source Code distributed by You under the terms of this License.

1.4. “Your Modules” means the Source Code distributed by You under the terms of this License that are not Covered Code.

1.5. “Covered Code” means the Source Code and Executable Code of the Initial Developer and Contributions that are incorporated in or delivered with the Original Code.

2. Source Code License

2.1. The Initial Developer Grant. The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) under intellectual property rights (other than patent or trademark) Licensable by the Initial Developer to use, reproduce, modify, display, perform, sublicense and distribute Source Code (with or without Modifications) and/or as part of a Larger Work;

(b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof);

(c) the licenses granted in Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

2.2. Contributor Grant. Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by a Contributor to use, reproduce, modify, display, perform, sublicense and distribute Source Code (with or without Modifications) and/or as part of a Larger Work;

(b) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone or in combination with its Contributor Version or other Modifications made by other Contributors, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Modifications (or portions thereof); and

(c) the licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first makes Commercial Use of the Covered Code.

2.3. Notwithstanding Section 2.2(b) above, no patent license is granted:

(a) for code that You delete from the Original Code;

(b) separate from the Original Code; or

(c) for infringements caused by:

(i) the modification of the Original Code or

(ii) the combination of the Original Code with other software or devices.

2.4. Contributor, Subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license

(a) under intellectual property rights (other than patent or trademark) Licensable by a Contributor to use, reproduce, modify, display, perform, sublicense and distribute Source Code (with or without Modifications) and/or as part of a Larger Work;

(b) under Patents Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone or in combination with its Contributor Version or other Modifications made by other Contributors, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Modifications (or portions thereof); and

(c) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination)

3. Executable Code License

3.1. Application of License. The Modifications which You create to or which You contribute are governed by the terms of this License, including without Limitation Section 3.1.

3.2. Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You may not remove or alter any copyright notices on the Source Code. You may not offer or impose any terms on any Source Code version which alters or restricts the applicable version of this License or the rights of the recipients hereunder. However, You may include an additional or different License or permission notice into any derivative Software, provided that such License notice or permission notice does not alter the applicability of this License with respect to the Source Code version, and provided the notice applies only to derivative Source Code and not to the Original Code.

3.3. Accessibility of Source Code. Any Modification which You create to or which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available with at least 30 days’ notice. You must make the Source Code generally available for at least 3 years after the last time to which you made the Source Code generally available, or at least 6 months after a subsequent version of that particular Modification has been made available to such recipients. You are responsible for ensuring that the Source Code version remains accessible even if the Electronic Distribution Mechanism is maintained by a third party.

3.4. Description of Modifications. You must cause all Covered Code to which You contribute to contain a file documenting the changes You made to create that Covered Code and the date and any changes. You must include a prominent statement that the Modification is derived, directly or indirectly, from Covered Code provided by the Initial Developer and includes some or all of the Modifications made by that Contributor.

4. Distribution Obligations.

4.1. Required Notices. You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a read me file) where a user would be likely to look for such a notice. If You create one or more Modular Modifications You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate the NOTICE file in any documentation for the Source Code where You describe recipients’ rights or ownership rights relating to Covered Code.

4.2. Notice of Source Code. You must provide a copy of this License and this notice along with every copy of the Source Code You distribute, or for each Modification You distribute.

5. Distribution of Executable Code

5.1. Required Notices. You must distribute the Executable Code in a form that includes a copy of this License and this notice along with every copy of the Executable Code distributed.

5.2. Description of Executable Code. You must provide a file describing the origin or ownership of the Covered Code.

6. Application of License

6.1. New Versions. Netscape Communications Corporation (“Netscape”) may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions. Once Covered Code has been published under a particular version of the License, You may always continue to use the terms of that version for your software development (or distribution for non-commercial development) and distribution. Participants in theOriginal Code under the terms of this License.

6.3. No Waiver. No one who has accepted the terms of this License (by virtue of which you may only do so in order to apply it to Code which is not already Covered Code governed by this License). You must (a) rename your License so that the phrase “Mozilla”, “MOZILLA”, “MPL”, “MPL”, “MPL” or any confusingly similar phrase do not appear in your license (except to note that your license differs from this License) and (b) otherwise make it clear that Your version of the license contains terms which differ from the terms of this License.

6.4. Effect of New Versions. Once Covered Code has been published under a particular version of the License, You may always continue to use the terms of that version for your software development (or distribution for non-commercial development) and distribution. Participants in theOriginal Code under the terms of this License.

7. DISCLAIMER OF WARRANTY.

7.1. COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF THIRD PARTY RIGHTS. THE DISTRIBUTORS OF COVERED CODE UNDER THIS LICENSE BY SUCH CONTRIBUTIONS OR MODIFICATIONS.

8. LIMITATION OF LIABILITY.

8.1. THE LIMITATION OF LIABILITY SET FORTH IN SECTION 11.2 SHALL APPLY TO THE EXTENT PERMITTED BY APPLICABLE LAW. THE LIMITATION OF LIABILITY SET FORTH IN SECTION 11.2 SHALL APPLY TO THE EXTENT PERMITTED BY APPLICABLE LAW.

8.2. THE CONSIDERATION FOR THE LICENSEE'S RIGHTS UNDER THIS LICENSE IS THE LICENSEE’S AGREEMENT TO ACCEPT ANY LIABILITY WHICH THE LICENSEE MIGHT OTHERWISE HAVE UNDER APPLICABLE LAW FOR INFRINGEMENT.

9. LIMITATION OF LIABILITY.

9.1. LIMITATIONS ON LIABILITY ARE NOT APPLICABLE IN CASES IN WHICH THE LICENSEE'S RIGHTS ARE REQUIRED TO BE DISCLAIMED. IN SUCH CASES, THE LICENSEE WILL BE ENTITLED TO ACT IN ITS OWN INTEREST.

10. LIMITATION OF LIABILITY.

10.1. NO LIMITATION OF LIABILITY IS PROVIDED UNDER THIS LICENCE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT OF THIRD PARTY RIGHTS. THE DISTRIBUTORS OF COVERED CODE UNDER THIS LICENSE BY SUCH CONTRIBUTIONS OR MODIFICATIONS.

11. MISCELLANEOUS

11.1. This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law (except to the extent applicable law, if any, requires another result), without regard to its choice of law provisions, and You consent to the exclusive jurisdiction of the Federal and State Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the bona fide party responsible for costs, including without limitation, court costs and reasonable attorneys’ fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which

provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.
As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and you agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

13. MULTIPLE-LICENSED CODE.
Initial Developer may designate portions of the Covered Code as Multiple-Licensed. Multiple-Licensed means that the Initial Developer permits you to use portions of the Covered Code under the terms of one or more public licenses, in any way, specified by the Initial Developer in the file described in Exhibit A.

EXHIBIT A - Mozilla Public License.
The contents of this file are covered by the Mozilla Public License Version 1.1 ("the License"), you may not use this file except in compliance with the License. You may obtain a copy of the License at http://www.mozilla.org/MPL/. Software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.
The Original Code is...

Portions created by... are Copyright (C)... All Rights Reserved.

Alternatively, the contents of this file may be used under the terms of the [___] license (the [___] License), in which case the provisions of the [___] License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the [___] License and not to allow others to use your version of this file under the [___] License, indicate your decision by deleting the provisions above and replace them with the notice and other provisions required by the [___] License. If you do not delete the provisions above, a recipient may use your version of this file under either the [___] License or the [___] License."

[NOTE: The text of this Exhibit A may differ slightly from the text of the notice in the Source Code files of the Original Code. You should use the text of this Exhibit A rather than the text found in the Original Code Source Code for Your Modifications.]

The Independent JPEG Group’s JPEG Software

The software included in this product contains copyrighted software that is licensed under the JPEG License:

- JPEG License
  - Code project : Generating Outline OpenGlLibjpeg

This distribution contains the sixth public release of the Independent JPEG Group’s free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

Serious users of this software (particularly those incorporating it into larger programs) should contact US at jpeg-info@bun.linux.net to be added to our electronic mailing list. Mailing list members are notified of updates and have a chance to participate in technical discussions.

This software is the work of Tom Lane, Philip Gladstone, Jim Boucher, Lee Crocker, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Guido Vollbeding, Ge' Lielist. Mailing list members are notified of updates and have a chance to participate in technical discussions.

The Independent JPEG Group is a nonprofit organization that develops the independent JpeG Software.

LEGAL ISSUES

In plain English:
1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the Source Code.

In legalese:
1. "T-Kernel" means a real-time operating system controlled and distributed by T-Engine Forum on behalf of the copyright holder thereof.
2. "Source Code" means a source program, including related comments and documentations, for the T-Kernel and the Ported Source Code defined in Article 2.6 which is registered with T-Engine Forum.
3. "Hardware-dependent Part" means the part of the Source Code which depends on hardware and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.
4. "Compiler-dependent Part" means the part of the Source Code which depends on compiler and needs to be changed when the Source Code is ported and operated on the target hardware, and is designated and separated as such part.
5. "Header File" means the part of the Source Code which contains definitions necessary to develop application programs.
6. "T-Engine Hardware" means the hardware which is manufactured in accordance with the T-Engine Hardware specifications or the µT-Engine Hardware specifications issued by T-Engine Forum, and registered with T-Engine Forum.
7. "Similar Hardware to T-Engine Hardware" means any hardware including software which emulates hardware other than that defined in Article 2.6 above, on which the T-Kernel can be operated.
8. "Ported Source Code" means a source program produced from the Source Code by modifying only its Hardware-dependent Part and/or Compiler-dependent Part to enable it to be operated on the T-Engine Hardware or the Similar Hardware to T-Engine Hardware. The Ported Source Code which is registered with T-Engine Forum shall be included in the Source Code.
10. "Binary Code" means an executable code form which is created by compiling programs, which include all or part of the Source Code or the Modified Source Code.
11. "Derivative Work" means the Modified Source Code or the Binary Code.
12. "Embedded Product" means any product which operates with executable code form of the Source Code, the Modified Source Code or the Binary Code loaded on its Hardware.
14. "System Developer" means any person who develops the Embedded Product by itself or has a third party develop the same, and provides, whether with or without payment, the End User with the Embedded Product.
15. "Distributor of Modification" means any person who produces the Modified Source Code and, whether with or without payment, distributes the same to any third party.
Article 1. The copyright of the Source Code shall be owned by Ken Sakamura.

Article 4. License of Source Code
1. As provided for in this Article, T-Engine Forum shall provide, and grant a license to use, the Source Code free of charge to any person who has taken the necessary procedure for registration as prescribed by T-Engine Forum and agreed to the T-License.

3. In accordance with the license granted under Article 4.1 above, the Source Code User may perform the following acts:
   1. to copy and/or modify the Source Code provided by T-Engine Forum hereunder for its own research, development and the like.
   2. to run the Source Code provided by T-Engine Forum hereunder for its own research, development and the like.
   3. to make the Binary Code available for the End User on the Embedded Product.

4. In case that T-Engine Forum considers that the Source Code has been used in violation of the provisions of this License Agreement, T-Engine Forum shall take the necessary measures to prohibit the third party from making the re-Distribution of the Source Code.

Article 5. Distribution of Modified Source Code
1. Any member of T-Engine Forum may become the Distributor of Modification by obtaining the approval of T-Engine Forum through the registration procedure as prescribed by the Forum provided that only the department of the A-member who has been granted an approval for distribution the Source Code shall be responsible for the distribution.

2. The Distributor of Modification may create the Modified Source Code based on the Source Code provided by T-Engine Forum and the Patch for Modification to be applied to create such Modified Source Code from the Source Code.

3. The Distributor of Modification shall, prior to the distribution, inform T-Engine Forum of and T-Engine Forum may publish, a method for distributing said Part(s) to third parties.

4. The Distributor of Modification shall determine the name of the Modified Source Code subject to the rules separately established by T-Engine Forum, and T-Engine Forum may publish an appropriate notice as required by the rules on the Patch for Modification.

5. The Distributor of Modification shall distribute the Modified Source Code to the third party, whether with or without payment, provided that T-Engine Forum shall not be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

6. The Distributor shall not make the Modified Source Code available for the End User other than those stipulated in Articles 4, 5 and 6 above.

Article 7. Use for Other Purpose
1. Any use of the Source Code, the Modified Source Code or the Ported Source Code other than those stipulated in Articles 4, 5 and 6 shall be subject to the prior approval of T-Engine Forum.

Article 8. Limited Warranty
1. T-Engine Forum and the copyright holder of the Source Code warrant that the Source Code does not infringe third party's copyrights. Provided, however, that T-Engine Forum and the copyright holder of the Source Code make no warranty as to the hardware-dependent Part and/or Compiler-dependent Part, which may have been distributed in the Ported Source Code.

3. Neither T-Engine Forum nor the copyright holder of the Source Code warrants that the Source Code does not infringe any third party's industrial property rights. In no event shall T-Engine Forum and the copyright holder be liable for any dispute which may arise between the Source Code User and a third party in connection with the third party's industrial property rights.

Article 9. Indemnity
1. T-Engine Forum and the copyright holder of the Source Code shall be liable for any damages (including, but not limited to, damages resulting from loss of profit, business interruption, loss of business information or any other pecuniary damage) arising out of use or impossibility of use of the Source Code, even if T-Engine Forum and the copyright holder have been informed of the possibility of such damages.

Article 10. Breach of Agreement
1. In case that T-Engine Forum considers that this License Agreement is breached or that the popularization of T-Kernel is obstructed, T-Engine Forum shall take measures to correct breach or such obstruction, take measures on the ground of copyright infringement, or take any other necessary measures against the person breaching the agreement or the obstructing person, regardless of whether or not the said person is a member of T-Engine Forum.

2. In case of breach of this License Agreement by a member of T-Engine Forum, T-Engine Forum may take appropriate measures against the member, for example, the member is disqualified from membership, depending on what kind of breach has been committed by it.

3. Any legal dispute which may arise in relation to any breach of this License Agreement shall be subject to the exclusive jurisdiction of the Tokyo District Court.

Article 11. Governing Law and Language
1. This License Agreement shall be governed by and interpreted under the laws of Japan.

2. This License Agreement is executed in both Japanese text and English text provided that the Japanese text shall govern the interpretation and performance of this License Agreement.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION
1. Definitions.
   a. "License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.
   b. "Licensee" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

mDNSResponder_bonjour
"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"you," "your," "you shall" mean an individual or Legal Entity exercising permissions granted by this license.

"Work" shall mean the work of authorship, including the original version of the Work and any modifications, additions, deletions, or adaptations that constitute derivative works or modifications of the Work under copyright law, whether you are called the Contributor, Recipient, or Sublicensee.

"Metadata" shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, including in Source or Object form, made available under the License, as indicated by a copyright notice that is included on or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any new works that are Infringed by the Work or which are derived from, or are based on, or modified based on, the Work and for which the Contributor receives no consideration in exchange for providing the Derivative Works.

"Licensee" shall mean an individual or Legal Entity exercising permissions granted by this license.

"Contributor" shall mean an individual or Legal Entity exercising permissions granted by this license and who is granted a license to create Derivative Works under this License.

"Notice" shall mean any attempt to contact a Contributor, the Legal Entity on behalf of whom a Contribution has been received by the Licensee, and subsequently incorporated within the Work.

"Contributor" shall mean an individual or Legal Entity exercising permissions granted by this license and who is granted a license to create Derivative Works under this License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this license, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"you," "your," "you shall" mean an individual or Legal Entity exercising permissions granted by this license.

"Work" shall mean the work of authorship, including in Source or Object form, made available under the License, as indicated by a copyright notice that is included on or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any new works that are Infringed by the Work or which are derived from, or are based on, or modified based on, the Work and for which the Contributor receives no consideration in exchange for providing the Derivative Works.

"Licensee" shall mean an individual or Legal Entity exercising permissions granted by this license.

"Contributor" shall mean an individual or Legal Entity exercising permissions granted by this license and who is granted a license to create Derivative Works under this License.

"Notice" shall mean any attempt to contact a Contributor, the Legal Entity on behalf of whom a Contribution has been received by the Licensee, and subsequently incorporated within the Work.

"Contributor" shall mean an individual or Legal Entity exercising permissions granted by this license and who is granted a license to create Derivative Works under this License.
