

RSM Two-Way Communication Module

Remote Speaker Module for PERS-4200 Personal Emergency Reporting System

Two-way voice communication can make a difference during an emergency. Linear extends the voice communications range of its advanced PERS-4200 Personal Emergency Reporting System Console with the optional Remote Speaker-Microphone Modules (RSM).

The RSM Modules (RSM-BASE and RSM-WALL) enhance the effectiveness of the PERS-4200 system. Clear, loud 2-way voice allows subscribers to talk with their central station operator from the bath, laundry, 2nd floor, or basement – anywhere within wireless range.

Users can move with confidence, knowing help is there when they need it.

Simple to setup, the RSM Base Module (*above*) delivers extended coverage for two-way PERS communication to Remote Speaker-Microphone Modules. (*left*)

Linear **RSM** Two-Way Communication Module

The Linear RSM Modules deliver simple setup, extensive two-way communication coverage and other conveniences.

- Easy installation - the plug-in Base Module (RSM-BASE) simply attaches to Linear PERS-4200 console
- Base Module supports up to 4 Wireless Voice Extender Wall Stations (RSM-WALL)
- Concealed line cord on the remote speaker allows for wall or tabletop mounting
- Compact, unobtrusive design
- Designed for use in the bathroom and other high-humidity environments
- Allows subscriber to hear Central Station operator throughout the entire home

Specifications: RSM-BASE

Color:	SABIC White
Size:	3-5/8" L x 2-5/8" W x 1-1/8" H. Protrudes from console 2-1/4"
Weight:	4.5 Ounces
Power Source:	Powered from console at 6.8-14.5V. Current depends on voltage & mode, from 0mA to 200mA
Frequency:	2.4 GHz (between RSM-BASE and RSM-WALL)
Warranty:	1 Year

Specifications: RSM-WALL

Color:	SABIC White
Size:	4-1/4" L x 4-1/2" W x 1-5/8" H.
Weight:	8.7 Ounces
Power Source:	100-240 VAC power supply; max 0.2 A (included)
Frequency:	2.4 GHz (between RSM-BASE and RSM-WALL)
Warranty:	1 Year
