

CN-DMXFLEX5-xx

Ultra Flexible 5 Pin DMX Cables

5Pin XLR M to 5Pin XLR F

Lengths: 2, 3, 5, 6, 10, 15, 20, 25, 50

CABLE CONSTRUCTION

The CSD5 cable is designed from the inside out to be the finest stage and tour grade DMX cable available. Every component of the cable itself is carefully chosen with the end goal of creating a tough, flexible, and interference free DMX cable.

Inner Conductors:

The four primary stranded inner conductors each have 20 strands of 0.12 bare copper. While many cable companies will lower cost by using inferior materials here (like aluminum with a copper coating), Elite Core CSD is pure, from the inside out.

Soft Cotton Stranded Filler:

To create the soft, pleasing feel of the CSD5 cable, we chose a natural cotton filler to round out the interior of the cable. It feels right, coils the way you want it to, and is pleasant to handle.

Braided Shield

The primary Braided shield provides an extra layer of ruggedness. It's effective in shielding from EMI and RF interference.

Outer Jacket:

The outer jacket of the CSD5 cable is opaque black PVC with an outside diameter of 7.6mm. PVC is the perfect material for this application because it holds its shape well and has great abrasion resistance. It's easy to clean and comfortable to coil.

CONNECTORS

CSD5 cables are hand terminated in our Custom Shop with Genuine Neutrik XX series connectors. Our standard is the black connectors with silver contacts. The XX series is the next generation of the worldwide accepted standard of XLR cable connectors. The successor of the X series offers several new features which make it more reliable, easier to assemble and improves contact integrity as well cable strain relief.

Features & Benefits

22 AWG stranded tinned copper

Polyethylene insulation

110 ohm low capacitance

100% Braided shield

Male connector with improved locking recess without "window", more stringent housing increases durability

Improved chuck type strain relief provides higher pull-out force and makes assembly easier and faster

Boot with polyurethane gland gives high protection to cable bending stresses

Colored rings and boots available for coding or identification

Sleek and ergonomic design - valuable and handy

Rugged zinc die cast shell, long lasting and dependable

Internal thread on shell is well protected against any damage

Branded with unique hologram - guarantees genuine and authentic Neutrik product
