

BlackVue DR650S-1CH 16GB 1 Channel Dash Camera (WIFI)

DR650S-1CH

RVS
SYSTEMS
A Safe Fleet Brand

The BlackVue DR650S-1CH is a reliable and ideal single channel dash-cam for motorists who simply want to record driving scenes from the front windshield. Upgraded from the DR650GW-1CH, this dash camera has all the features of the DR650GW-1CH just with some upgrades and additions. Full HD video quality catches detailed footage of driving and never misses a moment of what is going on in and around your vehicle. Built-in Wi-Fi allows you to communicate with the dash camera via the free BlackVue App on your smartphone or tablet and allows you to watch recorded or live video without removing the microSD card. A compact and sleek body in matte black makes it unnoticeable and its placement on the windshield does not affect the drivers vision.

The BlackVue DR650S-1CH comes included with built-in BlackVue Cloud. This allows the camera to connect to a WiFi network (car embedded internet or mobile hotspot) to be viewable remotely through the BlackVue app. Footage can be viewed and downloaded, location can be tracked and there can even be communication between the app and the camera. Keeping track of your vehicle while it's on the road has never been easier!

The system comes included with a 16GB microSD card and can handle microSD cards up to 128GB.
