Ethernet Over Coax Media Converter

Overview

GE Security's MCE-Coax is a high-performance converter that combines two well-proven technologies—Ethernet and VDSL—to effectively upgrade legacy devices to new IP-based digital devices. Converting between twisted pair (UTP) and coaxial, this technology offers the fastest data transmission speeds over existing coaxial cable without the need of rewiring.

The MCE-Coax Converter provides a quick replacement and smooth migration solution from an existing analog coax system to a full digital system. This unit is ideal for extending the distance and signal conversion and, because the converter allows the transmission of Ethernet format data using coaxial cable instead of new wire, it also saves wiring costs.

The converter offers plug-and-play functionality, with no software configuration required, and is fully compliant with multiple network protocols. Moreover, the rich diagnostic LEDs on the front panel provide the operating status of individual ports as well as the whole system. There are two selectable models of the MCE-Coax, one for client-side (CPE) and the other for central-side (CO) operation.

Standard Features

- Cost-effective VDSL2 CO/CPE bridge solution
- One-box design, CO/CPE selectable via DIP switch
- Complies with multiple standards including IEEE802.3, IEEE802.3u and IEEE802.3x
- Discrete Multi-Tone (DMT) line coding
- Half-duplex back pressure and IEEE802.3x full-duplex pause-frame flow control
- Supports up to 1536 bytes packet size, 802.1Q VLAN tag transparent
- VDSL2 stand-alone transceiver for simple bridge modem application
- Plug-and-play installation saves time
- Selectable target data rate and target SNR margin
- Extensive LED indicators for network diagnostics
- Compact size permits wall-mounting

Specifications

Hardware Specification	
Ports: 10/100Base-TX	1 RJ-45, Auto-negotiation and Auto-MDI/MDI-X
Ports: Coaxial	1 BNC, female connector
DIP Switch	4-position DIP switch
Functionality	<ul style="list-style-type: none"> • CO / CPE mode select • Selectable fast and interleaved mode • Selectable target Data rate • Selectable target SNR mode
Encoding	<ul style="list-style-type: none"> • VDSL-DMT <ul style="list-style-type: none"> - ITU-T G.993.1 VDSL - ITU-T G.997.1 - ITU-T G.993.2 VDSL2 (Profile 12a Support), Annex A
