Product Characteristics

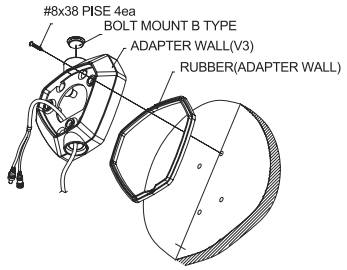

This product has been designed to be used in the installation of vandal dome cameras.
The product is strong and corrosion-free since it is fabricated using aluminum alloy material.
Various installation environments are supported for dynamic use.

Prior To Use

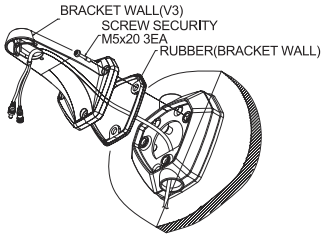

Avoid installing the mounting onto an unstable structure such as a gypsum wall panel.
Install the mounting onto a strong structure such as a concrete wall, steel beam, etc.
Use concrete screws with plugs or other installation tools when installing the mounting onto a concrete structure, Make sure that all the screw parts are metallic.
(Avoid screwing too close to the edge of a piece of wood when screwing into a wooden structure)

02DWM1 | Installation Method

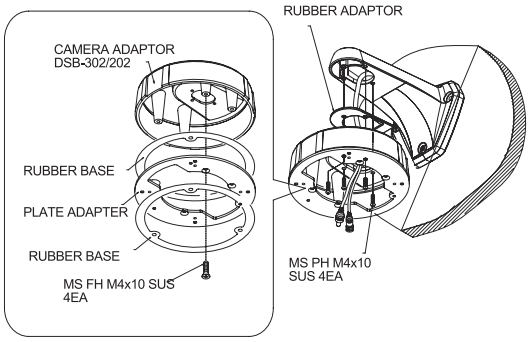

① Insert the cable onto the mount and attach it on the wall.

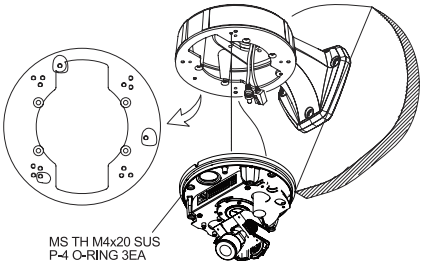

② Assemble the dome-camera installation mount and insert the cable into the mount

③ Insert the cable into the assembled mount, arrange the cable properly, fix it with screws and attach the mount onto the wall.

④ Connect the vandal dome camera.
(Connect the calbe in the Vandal dome camera and assemble the camera base with the camera adaptor as above picture.)
