

Commercial Grade Quick Connect Kit For Multiple Cameras

RVS-2135

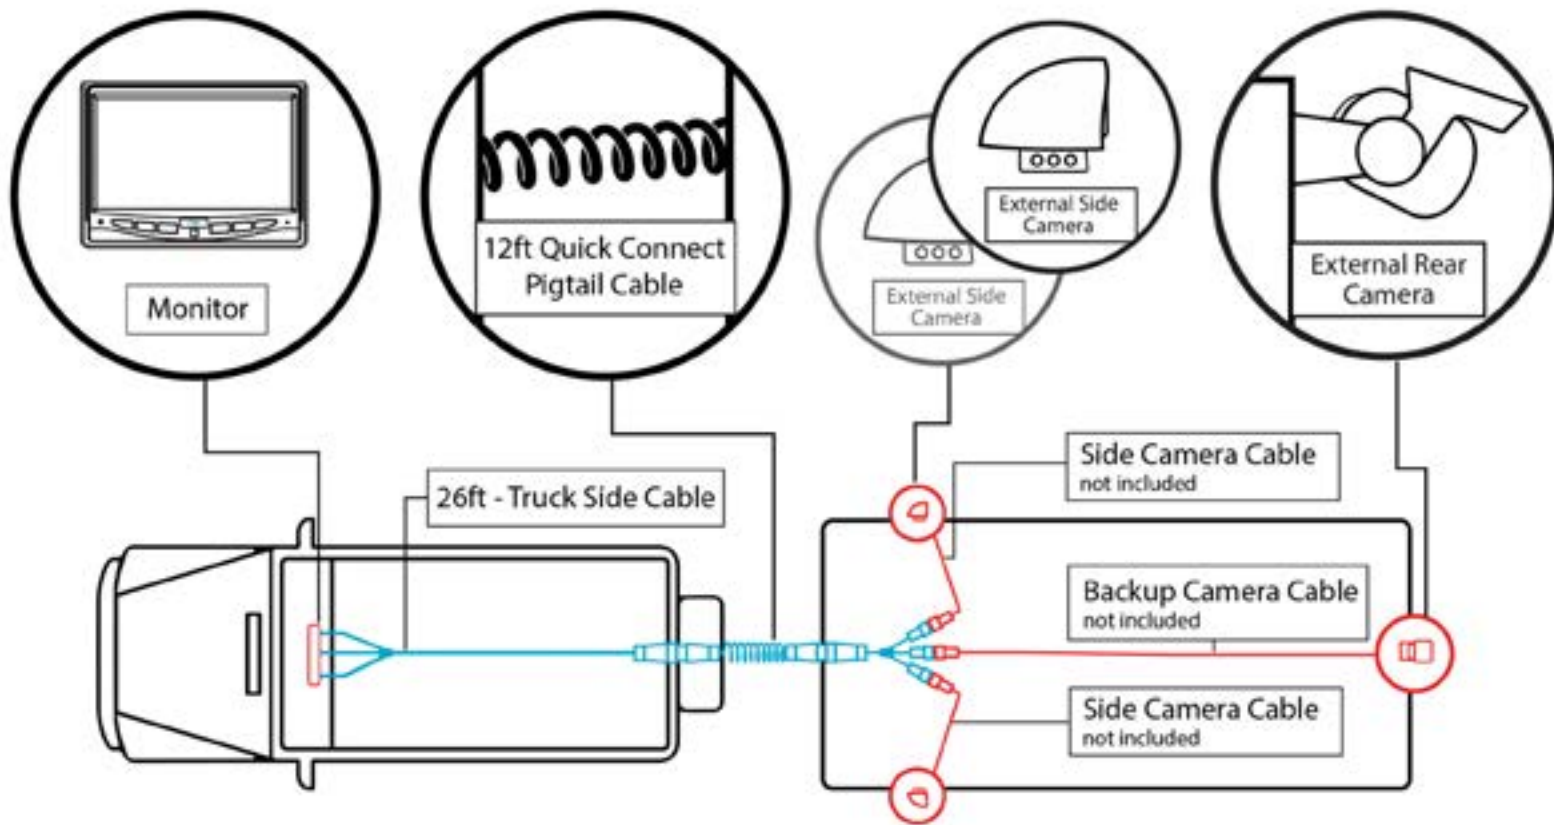

Commercial grade quick connect kit for multiple cameras. These cables allows one to wire his truck and trailer separately and connect/disconnect with just one pigtail cable. It comes with one mounting bracket for the back of the truck and one for the front of the trailer with a 12' pigtail that stretches between them.

Kit is split into three parts with each part able to be purchased separately. Part A is a mounting bracket for the front of the trailer with a three camera split to connect to the three camera cables. Part B is the curly pigtail cable that goes between vehicles and Part C is a 26' cable for the tow vehicle with a mounting bracket for the back of the vehicle which splits into three at the front of the vehicle to connect to the power harness.
