Notes on Use

Before Use

- Be sure to turn on the device by using the power switch.
- Be sure to turn off the device by using the power switch.

Data and security

- When the network is turned off, there is a risk of damage. Make sure the device is turned off when it is turned off.
- Be sure to turn on the device by using the power switch.

Access to the device and viewing images or sound in various cases

- The device is not protected from tampering.
- Be sure to turn on the device by using the power switch.
- The device is not protected from tampering.
- The device is not protected from tampering.

Phenomena Specific to Images

- The device is not protected from tampering.
- The device is not protected from tampering.
- The device is not protected from tampering.
- The device is not protected from tampering.

Notes on Notes

- The device is not protected from tampering.
- The device is not protected from tampering.
- The device is not protected from tampering.
- The device is not protected from tampering.

To ensure that the device is not tampered with, you should consult your security company.

To use the device, be sure to consult your security company.

About the Supplied Manuals

Installation Manual (This document)

This Installation Manual describes the functions and features of the network camera. When connecting to a network camera, make sure to refer to this installation manual before connecting the network camera.

User's Guide (stored in the CD-ROM)

Before using the device, please read the Installation Manual before operating.

About the Swtiched Mockup

Connect to the camera connection terminal of the PTZ camera.

Cable (Top)

- Power terminal
- Standby
- Camera (Front)

About the Supplied Manuals

Installation Manual (This document)

This Installation Manual describes the functions and features of the network camera. When connecting to a network camera, make sure to refer to this installation manual before connecting the network camera.

User's Guide (stored in the CD-ROM)

Before using the device, please read the Installation Manual before operating.

About the Swtiched Mockup

Connect to the camera connection terminal of the PTZ camera.
How to install the camera

1. Choose a location for the camera. The camera should be accessible and in a position that provides a clear view of the area to be monitored.

2. Use the screws supplied with the camera to mount the camera to the wall or ceiling.

3. Connect the power supply and any appropriate cables to the camera.

4. Test the camera to ensure it is functioning correctly.

How to install the wireless LAN

1. Connect the wireless LAN Card (IS SNC-FW1) to the sensor inside of the camera.

2. Connect the LAN port of the camera to the network connector of a wireless LAN router.

3. Configure the wireless settings on the camera and router.

4. Test the wireless network to ensure it is functioning correctly.

How to install the camera

1. Remove the top sunshade following Step 3 of “How to install the camera.”

2. Secure the camera and top sunshade using the screw on the top sunshade.

3. Run the fall-prevention wire through the top sunshade.

4. Connect the cable from the mounting arm and the cable from the top unit.

5. Insert the bolts about 3 mm into the screw holes.

6. Have a 5 mm hex wrench ready to loosen the bolts.

7. If the coupling is attached loosely or loose it may fall, be sure to tighten the coupling around the mounting arm so as not to fall or lose.

8. Temporary fix the two supplied bolts in the screw holes in the top part of the top unit.

9. Insert the nuts about one in the screw holes.

10. Connect the electrical cable from the mounting arm and the cable from the top unit.

11. Push the connected cables into the mounting arm.

12. Attach the spring to the cable using the bolts.

13. Place the nuts temporarily to the top unit in the groove of the coupling and turn clockwise in the direction of the arrow.

14. Secure the camera and electrical cable using the screw on the top sunshade.

15. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Open the camera housing and remove the screw fixing the camera housing.

2. Carefully remove the camera housing and cable from the camera body.

3. If the camera housing is not attached at the correct angle, it may fall.

4. For the fall prevention of the camera, make sure to use the wired fall-prevention system.

5. If there is a risk of water splash or exposure, be sure to tighten the bolts and screws of the mounting arm.

How to install the camera

1. Remove the top unit following Step 3 of “How to install the camera.”

2. Secure the camera and top sunshade using the screw on the top sunshade.

3. Run the fall-prevention wire through the top sunshade.

4. Connect the cable from the mounting arm and the cable from the top unit.

5. Insert the bolts about 3 mm into the screw holes.

6. Have a 5 mm hex wrench ready to loosen the bolts.

7. If the coupling is attached loosely or loose it may fall, be sure to tighten the coupling around the mounting arm so as not to fall or lose.

8. Temporary fix the two supplied bolts in the screw holes in the top part of the top unit.

9. Insert the nuts about one in the screw holes.

10. Connect the electrical cable from the mounting arm and the cable from the top unit.

11. Push the connected cables into the mounting arm.

12. Attach the spring to the cable using the bolts.

13. Place the nuts temporarily to the top unit in the groove of the coupling and turn clockwise in the direction of the arrow.

14. Secure the camera and electrical cable using the screw on the top sunshade.

15. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.

How to install the camera

1. Loosen the screws on the sunshade and remove the sunshade, referring to the installation manual of the mounting arm (not supplied), drill the appropriate holes and insert the screws.

2. Screw the supplied coupling on the mounting arm.

3. The fall-prevention wire goes through the hole of the wire bracket. Tighten the fall-prevention wire using the bolts.

4. Attach the supplied wire-fixing belt and wire bracket to the mounting arm outside.

5. Secure the camera and sunshade using the screw on the top sunshade.

6. Make sure to tighten the nut; if the nut loosens it will impair the waterproofing characteristic.
